

**Important tip for my Democrat friends...**

Before you gather those ballots and deliver them to the polling station, be aware that all tires now have a GPS chip installed. Look for that tiny antenna and snip it off to avoid being tracked.

The Minnesota Department of Commerce's Division of Energy Resources has added 64 new government bureaucrat positions to its roughly 90 employees, bloating its staff by nearly two-thirds, using your state and federal tax dollars. These additional bureaucrats will help manage seven new energy-related programs enacted by Minnesota's liberal legislature this spring, including a \$100 million "green energy" slush fund called the "green bank."

The executive director of the newly-created "Council on LGBTQIA2S+ Minnesotans" could make up to six figures, according to a new job posting on the Minnesota website. "Make a difference in the lives of LGBTQIA2S+ Minnesotans!" the job posting reads. "The Council on Lesbian, Gay, Bisexual, Transgender, Queer and/or Questioning, Intersex, Asexual, Two-Spirit plus (LGBTQIA2S+) Minnesotans is a state agency that advises the governor, legislature, agency leaders and other stakeholders on matters of interest to Minnesotans in the LGBTQIA2S+ community." The salary range for the position is up to \$129,247.00 annually.

Minnesota will adopt California's car mandates requiring an increase in electric vehicles offered for sale and decreased tailpipe emissions of carbon dioxide after the U.S. Supreme Court declined to take up a lawsuit filed by the Minnesota Auto Dealers. Minnesota auto dealers will collectively be required to stock approximately 14,000 new electric vehicles on their lots throughout the state in 2024.

CNN has redefined shoplifting as shopping without money and now plagiarism as sloppy attribution.

The Associated Press, not only claimed conservatives were responsible for Harvard's Claudine Gay's resignation after she was found to have plagiarized her academic work almost 50 times, but it also claimed that "white colonists" practiced scalping on Native Americans

New York Times writer Mara Gay said on MSNBC that she believed Harvard University ex-president Gay resigned over the right's racist attacks on "academic freedom," not the several instances of plagiarism.

MSNBC anchor Joy Reid said that Harvard University ex-president Claudine Gay was a casualty of the right's "open war on black progress."

The Associated Press's latest donor wants to transform journalists into "community activists on climate change." The AP didn't publicize that. The KR Foundation, a Danish nonprofit that seeks the "rapid phase-out of fossil fuels," gave the equivalent of \$300,000, to the Associated Press.

**That Gay plagiarist at Harvard will still get \$900,000.00 salary...oops...LSM forgets to mention that!**

August 8, 2023 Lahaina, Hawaii: fire destroyed the town and killed an unreported (so far) number of people. Lame Stream Media has ignored this story and moved on to the more important conflicts between trans people and airport employees. The fire destroyed 2,200 residences in the surrounding area and 500 businesses. Governor Josh Green (D) says that 103 people died in the fire. Trucks carried the dead away ... an estimated 600 bodies. No one knows the number of homeless and unknown tourists who were in Lahaina on the day of the fire. One of the elementary schools that burned down held 650 kids. They were all home during the fire. There are 200 of those kids temporarily schooled in a school that survived. There is no record of where the other 450 are now. The government has announced a "temporary" school will be built to replace the one lost...at a cost of \$54 million. City official Herman Andaya withheld water from fire fighting efforts for some unknown reason and has since been "reassigned". Maybe he should have imported water from East Palestine, OH since the train wreck there contaminated that water although those city officials claim it is safe. Joe Biden promised to visit East Palestine...the podium still sits empty at their airport since Joe is still on vacation. *Oh...and remember this one?* The Chinese spy balloon that flew over the US in February used an American internet provider to send high-bandwidth data back home...data that the government said was just weather information.

Joe Biden wrote the law so you can't discharge student loans in bankruptcy ... his political career has been sponsored by banks.

Remember the Nicholas Cage car theft movie tasked with stealing 50 cars in a 72-hour period? That's about 17 cars per day. In 2023, Minneapolis has 7,769 auto thefts, over 21 per day, or one per hour.
