

Israel does not have anything like our second amendment. Gun control in Israel is relatively strict, and firearm licenses are generally only granted to those who can show a need for extra security in their line of work or daily life. Meaning, one of the key criteria for a private citizen to receive permission to own a gun is where they live. In Israel, the personal weapon allowed are pistols with a limit of 50 rounds of ammunition. To qualify, there are bureaucratic hoops similar to those found in Democrat states like Minnesota where the limited time permit will cost about \$275. They call it gun control but when you factor in over 330,000 permits at the \$275 cost...I'd guess MN politicians have another motive for the permits. Israel has now authorized the purchase of 10,000 rifles which they are handing out to their citizens free of charge. **Reality bites!**

Joe Biden allowed roughly four million illegal migrants into American communities during his first 26 months in office....and they are still coming. Gun sales have hit records while over 150 illegals caught at the border were on the FBI terror watchlist this fiscal year.

The Frank Report

Hide'n from Biden?

All the news I see fit to print.

Freedom of the press belongs to those who own one.

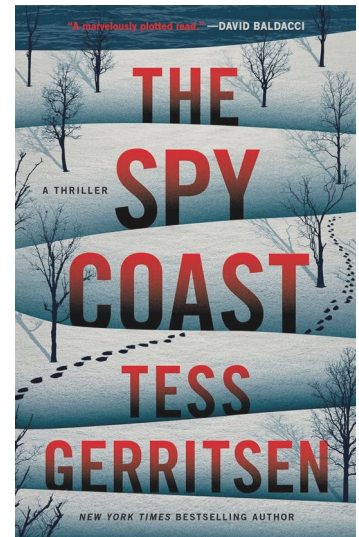

"There is a principle which is a barrier against all information, which is proof against all arguments and which cannot fail to keep a man in everlasting ignorance – that principle is contempt prior to investigation."

"Journalism" is focused on contempt as click bait. That's why The Lame Stream Media's claims of "conspiracy theory" becomes fact without their acknowledgement of their error nor an apology for their erroneous label.

"This news article was partially created with the assistance of artificial intelligence and edited and fact-checked by a human editor". American Military News reporting on gun manufacturer Smith & Wesson's move of their headquarters to TN from Massachusetts. Perfect disclaimer and shot at the LSM.

The Fog of War: We're getting more coverage of the attack on Israel in a few days than the total from the Ukraine "War". So how is our fearless leader handling any preparedness for a similar attack on the United States?

The federal government believes that the threat of violence and major civil disturbances around the 2024 U.S. presidential election is so great that it has quietly created a new category of extremists that it seeks to track and counter: Donald Trump's army of MAGA followers. The challenge for the Federal Bureau of Investigation, the primary federal agency charged with law enforcement, is to pursue and prevent what it calls domestic terrorism without direct reference to political parties or affiliations—even though the vast majority of its current "anti-government" investigations are of Trump supporters, according to classified data obtained by Newsweek.

Book Report

One of two free eBooks from Amazon Prime this month, this is an author I had found previously. The focus on older generation retired spies forced back into action decades later makes for an interesting plot. The characters are very well developed and will be back in the second (2025).

youtu.be/7ZPTukqjIMM is a link to an historical explanation of how it came to be (Mark Dice...check out the Amazon eBook above he is offering for even more details).

Inclusive history involving government and tax money to control the narrative.

Pope Francis has thrown the moral authority of the papacy behind the so-called climate crisis, insisting that the world *"is collapsing and may be nearing the breaking point"* due to global warming. *"If we consider that emissions per individual in the United States are about two times greater than those of individuals living in China, and about seven times greater than the average of the poorest countries, we can state that a broad change in the irresponsible lifestyle connected with the Western model would have a significant long-term impact,"* he declared. *Maybe Greta Thunberg will finally be going to college...College of Cardinals?*

Meanwhile: Biden's National Security Spokesman, John Kirby, Asserts Climate Change More Existential Threat than Nuclear War. Kirby repeated the words of Biden from last month: "The only existential threat humanity faces – even more frightening than a nuclear war – is global warming; going above 1.5 degrees in the next 10 years." *I'd like to find out what these guys are drinking.*

BTW: did you know that a naked selfie of Joe Biden's brother Frank has been discovered on a gay porn site? Maybe all that climate warming was getting to him?

And: The Biden administration and key lawmakers in Congress are actively discussing whether aid to Israel could be linked to more funding for Ukraine as a strategy to pass both spending priorities. They gave away all our ammunition...now it's any money left over after Bidenomics. The Strategic Oil Reserve is down to 17 days so I guess that's safe...for now. Maybe we can start borrowing money from Ukraine instead of China? How about a 10% tax on all PAC money donated to politicians and charge permit fees for lobbyists.

Tidbits

(a small and particularly interesting item of gossip or information)

Former Speaker McCarthy transferred over \$1.8 MILLION from the Protect the House 2024 joint fundraising committee to his own personal Kevin McCarthy for Congress re-election fund.

A left-wing Philadelphia journalist who mocked concern over rising crime in Democrat-run cities was shot to death in his home.

James "Jim" Moran, who served as a Democrat Virginia congressman for 24 years before retiring in 2015, launched Moran Global Strategies (MGS), a lobbying firm for international clients. The Ukrainian government will pay him a \$25,000 monthly fee, which will be funneled through Ukraine Freedom, a nonprofit organization. *Guess where the Ukrainian government gets that money?*

The revolving door between the Defense Department and the arms industry means 80% of retired US generals go to work for arms makers.

Total federal lobbying was \$4.1 billion in 2022, a record!
