

18th century sculpture called Disillusion, which includes an intricate net carved from a single block of marble, was created by Francesco Queirolo without assistance; no apprentice would touch it for fear of the delicate net crumbling in their hands.

It took him seven years.

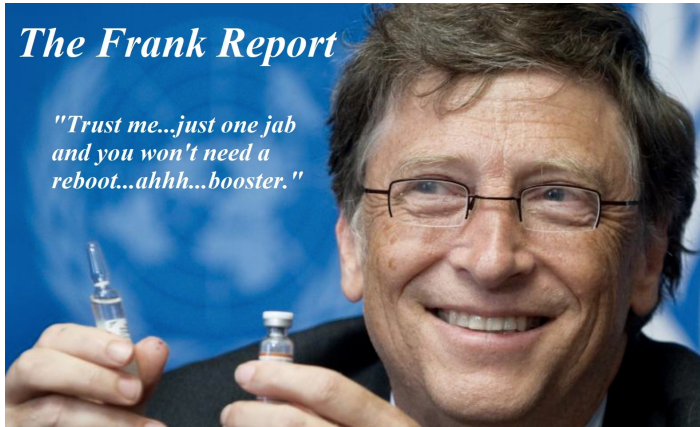

Hamas apprentices created this monument to George Floyd in downtown Minneapolis after Chauvin found guilty of murder even though testimony proved him innocent.

It took them less than a week to destroy the area with \$500 million damage to 1200 businesses.

What would happen if Putin tried this with Trump?

11.4.2023 #407

All the news I see fit to print.

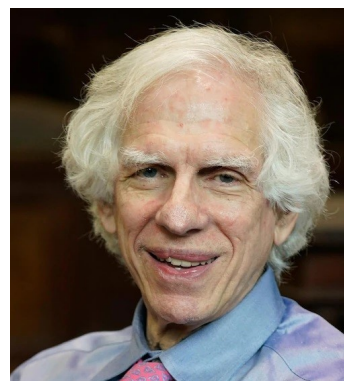

Freedom of the press belongs to those who own one.

Some of you are aware of my battle with Microsoft since their business plan has jumped all over the place from one time contracts to subscriptions. To compound the confusion, they have bastardized the OneDrive app that is hidden in their operating system. Some of your files go into the cloud and are duplicated in files hidden from you on your computer. I'm learning more than I ever wanted to know about how it works...I just want it to work. Finally found someone who speaks IT and will help migrate to my new computer (and the backup). I will admit that the instructions for using a computer reminds me of the manuals we got twenty years ago with our cars. You could follow clear instructions to adjust the valves. Now they just warn you not to drink the liquid in the battery. However, the computer instructions read like they skip every third step when you try to figure out how to fix it.

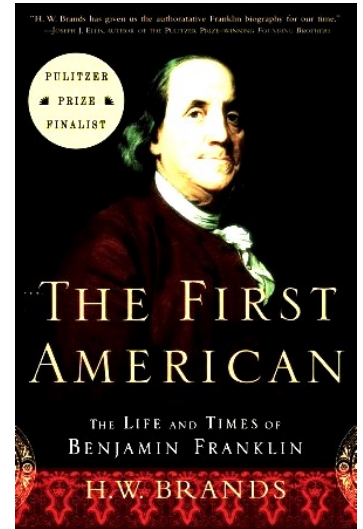

Maybe that's the IT community's job protection strategy?

18 U.S. Code § 595 makes it a federal crime if any federal, state or local government employee uses "official authority for the purpose of interfering with, or affecting, the nomination or the election of any candidate for the office of President."

Judge Arthur Engoron trial claims civil fraud lawsuit against Trump.

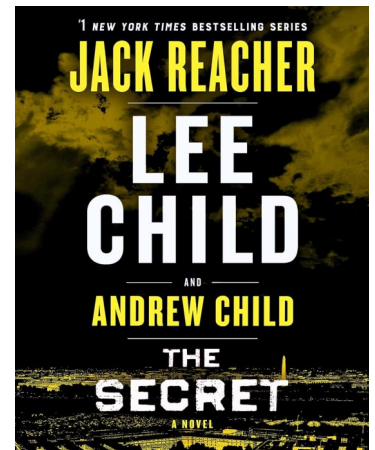

This judge is a former cab driver, music teacher, member of a bar band and the American Civil Liberties Union...also a one-time Vietnam War protester. The judge is in addition to three prosecutions in four cities with six trials, four indictments and four criminal investigations. Soros must be getting nervous as his minions over do the process and commit egregious judicial missteps sure to add even more millions to Trump's bank account when he begins his counter attack.

Book Report

This one reads like one of the **Reacher** novels. The author presents an uncensored Franklin from Ben's own diaries and speeches. Using wit and words, Ben was always able to come up with a reason for his actions and then, decades later in his journal, treated us with an honest reflection on what he should have done. It's an easy read and really captures who this guy was.

Yes...worth waiting for as #28 hits the mark again. He's mid way through his military service and teamed with other "misfits" to investigate while they hope they will miss the government screwup. Not gonna happen with **Reacher**.

The world uses the metric system. We use it for bullets.

If you're offended by me, I'm offended that you think I care.

A government license takes away your right to do something and then sells it back to you.

What the hell is an original copy?

Trust will give you a friend or a life lesson.

Why do politicians always try to make us part of an historical event?

So much to do. So little desire to do it.

Smile on the outside. Scream on the inside. Hell of a choice.

Don't give up on your dreams. Go back to sleep.

Being popular on Facebook is like sitting at the cool table in the cafeteria of a mental hospital.

People keep interrupting me when I'm ignoring them.

Patience has been described as that time when there are too many witnesses.

Remember when they said you should wear a mask when you go shopping? They lied. Everybody else had clothes on.

Have your kids ever complained about no food in the refrigerator; just ingredients?

Clock in my car is finally correct.

Remember the Keystone pipeline Biden cancelled "on his first day" that could have been delivering 830,000 barrels a day right now? The World Bank reported that oil prices could be pushed into "uncharted waters" if the violence between Israel and Hamas widens, which could result in increased food prices worldwide. Also remember when President Trump led our country to become an energy exporter for the first time in decades?

Then there is the open border. Ever wonder what's up with the Democrats so insistent on keeping it open? Try this...the number of illegals who invaded under Biden is larger than the population of 38 states; **over eight million and counting**. The clever Democrats supplied them with cell phones and with \$2200 monthly. Now think of election time when all illegals could get messages with instructions how to register and vote to keep getting paid \$2200 month. Joe Biden is charging Americans for their evacuation from Israel while he pays to transport illegal immigrants in the United States.

The United States has started bulk buying Japanese seafood to supply its military in response to China's ban on such products imposed after Tokyo released treated water from its crippled Fukushima nuclear plant into the sea. U.S. ambassador to Japan Rahm Emanuel said Washington should also look more broadly into how it could help offset China's ban that he said was part of its "economic wars."

Guess that makes up for lack of uniforms and delayed pay for military? Maybe they want our military to glow in the dark. Rahm is Hillary's oldest buddy...but not ours.

There's hope: House Republicans released the new Israel aid bill. It offsets \$14.3 billion in Israel aid with \$14.3 billion in cuts to the IRS. This bill includes zero assistance for Ukraine at this time. They want the transparency of stand-alone bills.

So do we!

Tidbits

(a small and particularly interesting item of gossip or information)

True costs of fueling an electric vehicle, including excess charging costs and subsidies, is equal to \$17.33 per gallon of gasoline.

Trump has been cleared of one of the nuisance charges Democrats have thrown at him since 2020. After a **four-year** review, DoJ found that Trump did not influence the FBI's decision to stay in Washington, D.C., instead of moving. WTF?

When the vote for new speaker Johnson was taken, Rep. Angie Craig, a lesbian Minnesota Democrat screamed out, "Happy Anniversary to my wife." **Isn't that precious!**

Maine Shooter Committed Suicide by Shooting Himself in the Head...

Twice...Hillary caught him? Retroactive misdemeanor charge for bringing a gun into a no gun zone?

Also in Maine...by moving from the men's cross country category to the women's, a male high school sophomore has become one of the best 'female' runners in the state... from 172nd to 5th place.

Critics of the new speaker of the house claim he has least political experience of any previous speaker while Biden has the most of any previous president. Well...duh?

Until next week...
