

## The Frank Report

Celebrate Black History Month by taking a moment to honor the most accomplished African American of his generation. Yes, Elon Musk.

Elon Musk said SpaceX has redirected its immediate focus toward establishing a self-sustaining city on the Moon, marking a departure from his company's long-standing Mars-first strategy.

He will prioritize the development of a "self-growing" city on the Moon over its previously primary objective of Mars colonization. According to Musk, this lunar city could become reality in less than ten years.

For you old people, Jackie Gleason's famous phrase "To the Moon, Alice!" wasn't a comedic, exaggerated threat used by his character Ralph Kramden but prediction?

Maybe we should ask Elon to name one of the moon spaceships Alice?

Even better, make a list of politicians to send in it. Nancy Pelosi to sit ON it?

Former (*Thank You God*) Senate GOP Senate leader Mitch McConnell is still Chairman of the Senate Rules and Administration Committee and is stalling the **SAVE Act**. 83% of Americans want proof of citizenship to vote, yet the Senate has done nothing for 300 days after it was passed by the House. 48 of McConnell's Republican Senate colleagues — a super majority of the Republican Senate Conference — have cosponsored the bill.

McConnell is retiring yet is still trying to control things. Kentucky Senate Republican candidate and self-made businessman Nate Morris is Trump's endorsed replacement of Mitch McConnell. McConnell's control of Kentucky's GOP is evidenced by the McConnell machine spending millions of dollars to back the candidacy of Andy Barr. Morris is surging in the polls indicating Kentucky ready to make a break from the McConnell machine.

***Some background in the SAVE Act:***

The Constitution Elections Clause states, "The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof; **but the Congress may at any time by Law make or alter such Regulations, except as to the Places of choosing Senators.**"

The SAVE Act simply fixes a flawed section of the Democrats National Voter Registration Act of 1993 that bars states from requiring documentary proof of U.S. citizenship registering to vote. Instead, states had to accept a glorified honor system devised by them to make it almost impossible to prevent election fraud. Senate Minority Leader Chuck Schumer, D-NY, calls the SAVE Act "an abomination" and "Jim Crow 2.0."

Democrats claim that photo ID and documentary proof of citizenship would disenfranchise "millions of voters."

Safeguard American Voter Eligibility (SAVE) Act

All voters must show identification to register to vote.

All voters must show identification to vote.

No mail-in ballots (*with strict exceptions*).

*Facts about our election are emerging showing how Democrats used that 1993 legislation to actually steal elections.*

Governor Gavin Newsom has been heavily involved in promoting California's high-speed rail project, despite widespread criticism over delays, soaring costs, and lack of tangible progress. Once projected to cost \$33–\$45 billion and connect Los Angeles to San Francisco by 2020, the project is now estimated to exceed \$128 billion, with the initial segment not expected to open until 2033.

Newscom wants a high speed train to relieve traffic congestion. Maybe he should have asked Elon Musk how to do it. The Boring Company was founded in 2017 by Elon Musk to address urban traffic issues. At CES (Consumer Electronics Show) 2026, the Vegas Loop built by Elon's company, moved over 90,000 passengers in a short period, peaking at over 6,600 riders per hour- It's fully underground, fully electric, and completely separate from surface traffic. And it's not just for major events. In late 2025, the system was moving up to 35,000 people per day during peak periods.

The Democrats are focused on two things right now...blocking the SAVE Act and preventing the deportation of illegal aliens. That kind of passionate opposition to election integrity tells you everything you need to know about the Democratic Party of 2026. To fight this hard against a bill that would make it absolutely clear that foreign nationals cannot vote in federal elections? Why? Because they want illegal foreign nationals to be able to vote in federal elections.

Mail in ballots for the these six POTUS elections:

2004: 15 million

2008: 23 million

2012: 27 million

2016: 33 million

**2020: 70 million**

2024: 49 million

November 4, 2020: Georgia Secretary of State Brad Raffensperger said Trump led by 103K votes with only 94K ballots left. Four days later, there were 300K more ballots, including 148K absentee ballots from Fulton County. That's 25,535 more ballots than voters, more than double Biden's margin. Over 133K ballot images were deleted. Zero of 148 Fulton County tabulators had the required tapes. Nearly 7K fictitious ballots remain certified, and no one investigated. Grand jury testimony revealed that Gov Kemp told the chief of Georgia Bureau of Investigation not to [investigate] allegations of fraud in the 2020 election, Saying he was a "team player," the official dropped the case.

*The absentee mail in ballot is just one of many forms of election fraud. I'm again including the comprehensive list from an article about fraud as an attachment.*

Even the then corrupt FBI was nervous about what the Democrats were doing. The FBI conducted a tabletop exercise in summer 2020 that imagined what sort of violence might ensue in a contested presidential election that year, devising strategies like undercover informants and mass prosecutions for minor crimes that it would later use with the Jan. 6 Capitol riot kangaroo court. These documents were obtained by FBI Director Kash Patel and turned over these long-secret memos to Congress, providing fresh evidence that federal law enforcement was acutely concerned for months ahead of time about the potential for violence in the aftermath of the 2020 election.

Let's not forget our friends at the Lame Stream Media. CBS investigative journalist Catherine Herridge has gone public and said: "CBS executives deliberately buried the 'Hunter Biden laptop story' and ordered me to wait until AFTER the 2022 midterms to help the Democratic Party."

The Election Fraud Map from the Heritage Foundation documents proven instances of election fraud.

Minnesota tops the list for the most proven cases of election fraud in the country.
