

### Recipe Corner

(is being invaded by idiots!) **The City Council of Eugene, Oregon**, has decided to ban natural gas hookups in new residential construction. This move makes Eugene the state's first city to prohibit new homes from using gas furnaces, water heaters, or appliances.

Over 70% of those surveyed are against the ban but the City Council still voted for it because they have concerns about climate change and public health. Reaction was mixed but one group was very specific with its reaction: counties in Eastern Oregon are looking to be annexed to Idaho. (*Eugene was the strangest town we ever lived in.*)

Not to be outdone, a few MN liberals introduced legislation to ban any types of non-electric lawn equipment by January 1, 2025.

My congress critter, Angie Craig, was attacked in her DC apartment building by a serial offender just released on no bail so she voted for stricter laws in DC for repeat offenders. Took her long enough but I guess she doesn't visit Minneapolis very often.

Oh, and Illinois will require at least one electric vehicle charging station for each residential unit with dedicated parking.

Look to the liberals for these recipes for disaster. If a few more liberals get mugged, will they become aware of reality or even become conservatives?

# The Frank Report

2.18.2023 #370

*All the news I see fit to print.  
Freedom of the press belongs to those who own one.*

The House Oversight and Government Reform Committee has a very specific function in DC circles that apparently too few understand. It was created by the House leadership to make money for the party in control of the Chair. When the House Speaker is notified of a DC corruption issue, they will refer the matter to this committee so they can hold hearings, create soundbites and fundraise from the issue. Let's check, left to right, the four above: **Fast and Furious** gun running...Agent Brian Terry still dead but Obama apologized...**IRS targeting**...Lois Lerner "lost" her emails pled the fifth and walked out with her pension in place after receiving \$130,000.00 in bonuses during the IRS targeting of conservatives...**Benghazi**...spent three years and \$4 million and Hillary is still laughing at them.

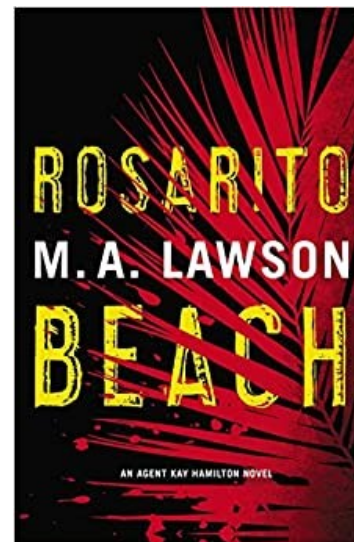

Latest is the **Twitter files and FBI scandal**. Kevin McCarthy raised \$12.3 million in his first one day fundraising event since being elected Speaker of the House. McCarthy was joined by Republican House Oversight Committee chair James Comer.

This is just how Republicans have used the "committee" when they controlled the Speaker's Chair. What did the Democrats do with this Kabuki theater? Ask President Donald Trump.

This has been going on for decades. Remember the **Warren Commission** about the assassination of Kennedy? We got 26 hearing volumes with testimonies from 550 witnesses and 235,000 copies of the report with 5,600 sets of the hearings. Half a century later the CIA finally admitted involvement.

Benjamin Franklin: **"We have a Republic...if we can keep it."**

**We have elections which "they" have now taken from us. We also have half a billion guns. Our judicial system seems hell bent on giving us a growing list of potential targets.**

### Book Report

We have a winner! Mike Lawson's new character, **Kay Hamilton**, is different than **Joe DeMarco** (15 and counting in that series). **Kay** is a DEA agent focused on catching the bad guys and to hell with politics. Three (so far) in the series and hope Mike can keep up the pace. Did notice different publisher for this series. Got a nice email reply from Mike that was not a boilerplate response so I figure he appreciates his fans.

All that crime fighting by **Joe** and **Kay** is for naught as Democrats pack the federal bench with idiots...not one Democrat has objected to the installation of even one Biden appointed federal judge. The Democrats are focused on party "unity" rather than the qualifications of the judges nominated. Biden now has more than Trump.

**The following gleaned from just 15 minutes of scanning  
the news at Whatfinger.com:**

The price of a new Ford 150 electric truck increased 40% since launch. Costs have more than DOUBLED for battery minerals such as cobalt, nickel & lithium. The battery accounts for ~30% of the total cost of an electric vehicle. (Green New Deal Scam?)

Big pharma rakes in 100 billion dollars in 2022 – that's \$100,000,000,000 – by selling toxic "vaccines" during a humanitarian crisis. Add another 131 billion dollars in profits from 2021. (They're not done!)

Final Court Documents Containing Names Of And "Salacious" Information On Epstein's Cronies To Be Unsealed (Jeffrey Epstein and Ghislaine Maxwell jailed but none of the "participants").

California Attorney General Rob Bonta's wife, Assembly "member" Mia Bonta, has been tapped to lead a budget committee that oversees and helps determine her husband's agency's spending. (Well sure!)

At least a half-dozen colleges in the United States offer Diversity, Equity and Inclusion degree programs and dozens more offer certificates or other qualifications in DEI. (And if they can't get jobs with this degree, they'll become the "professors" for these programs? See how that works?)

A proposed new plant that would have brought jobs and significant private investment to northern Minnesota will not be coming to fruition. Huber Engineered Woods (HEW) announced in a news release that the company would not move forward with its plan to build a \$440 million manufacturing facility in Cohasset, Minn. (Thanks Governor Timmy!)

The Minneapolis Police Department reported auto theft related crimes for the first month of 2023 during which they said the city experienced more than 700 auto thefts, 33 carjackings and 260 thefts from motor vehicles. (Meanwhile, Minnesota Freedom Fund lobbies for legislation and endorse political candidates to help end the state's cash bail system....and defund the police. Maybe they can get Angie Craig's help with this?)

**More:** The government is paying \$2,125/month in refugee benefits to aliens resettled in the United States while, Social Security recipients who have paid into the system receive \$1,400 per month on average.

Several committee meetings underway with Lame Stream Media deflecting attention to alien balloons, orange man still bad and Biden saving the economy...but NOTHING about election integrity. Kari Lake sole voice currently being ignored by the Lame Stream Media.
