BTW: Whatfinger.com liked the meme above I created and ran it.

It's been so cold in Minnesota that the politicians have had their hands in their own pockets. It does keep the riff raff out.

**The CDC says the flu is almost nonexistent this year because of wearing masks and social distancing.
The CDC says COVID-19 is out of control because no one is wearing masks and social distancing.**

Only 23 Americans Test Positive for Flu Compared to 14,657 Cases Reported Same Week Last Year.

CDC Data Shows High Virus Survival Rate: 99% Plus for Ages 69 and Younger, 94.6% for Older

It took three decades to develop the flu vaccine and it is only 40% effective. The COVID-19 vaccines were developed in less than ten months and multiple deaths are being reported from their use.

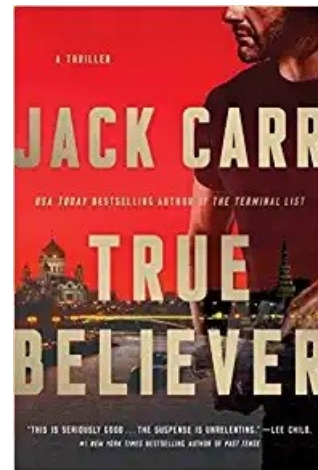

According to the WSJ, there is a "new and potentially lucrative COVID-19 industry" that is "emerging" from all this. It includes manufacturers of masks, of course, as well as companies that make air quality monitoring devices, filters, diagnostic kits, and drug "treatments."

Dr. Fauci has been in government 52 years and draws the highest salary of any government employee. He has been a constant figure on television. He does not represent science. His actions are not science. He has demonstrated how products are sold.

After over a year of this crap, I have asked Hiroo Onoda and Shoichi Yokoi to show me their hiding places. (yeah, I'm gonna make you look them up)

Book Report

Follow up to Carr's debut *Terminal List*; shows great improvement of an already competent story teller. Chris Pratt will be starring in screen version of *Terminal List* at Amazon. Third book in the series (*Savage Son*) and fourth already penned. H/T Larry Wingate for tipping me on this new author.

On a binge right now with seven *Joe Pickett* books in the queue, Highly recommend C.J. Box for great thrillers.
