

Obama judge appointee Theodore Chuang, ordered Elon Musk and DOGE to reinstate all of USAID's functionality. The judge also barred DOGE from any further actions related to USAID's closure. It appears DOGE figured out a way to checkmate the judge: A senior DOGE official has now taken over USAID and will have authority over the agency. Secretary of State Marco Rubio will "effective immediately" designate Jeremy Lewin as chief operating officer. Democrats are relying on a small group of lawyers (Weissman, Elias, etc.) to create the lawfare but they are out numbered and outwitted by a much larger group of lawyers in the Trump administration who are not only stopping the lawfare...there are impeachments and law-suits in the works to put a final nail in the Democrats frantic efforts to blunt what America hired Trump to accomplish. Delivering on promises the Democrats vowed would never happen. The Dept of Education has just been axed with everything coming back to the states.

 Freedom of the press belongs to those who own one.*

Trump has been bombarded with a record 129 legal challenges and 64 injunctions in just two months since his inauguration. Only two of these cases have been resolved.

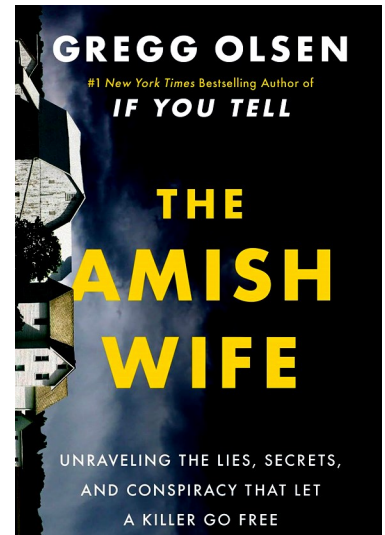

President Donald Trump signed an executive order to clamp down on the growing abuse of America's judicial system by radical activist judges and far-left organizations targeting the reckless pursuit of frivolous injunctions, which have repeatedly cost taxpayers millions and disrupted governance.

The memorandum, addressed directly to the heads of executive departments and agencies, instructs them to firmly enforce Federal Rule of Civil Procedure 65(c), which says that anyone who asks a court for an injunction (a temporary order stopping a government action) **must first deposit money** or a bond with the court. The money covers harm or costs to the government if the court decides that the injunction was improperly issued.

Agencies must deal with the Attorney General to decide how much money and they must justify that amount to the court. The ink was barely dry before two injunctions were filed. *Makes you wonder when a judge will appoint himself president.*

A federal judge has tried to block President Trump from revoking the security clearance of Perkins Coie, the law firm which helped develop the Russia Hoax. This is the law firm that helped manufacture the Russia hoax and is funded by George Soros to the tune of \$22 million. They are still deeply embedded in every major left-wing lawfare attack against Trump and the American people. The judicial branch is now trying to tell the President that they are in charge of any security clearance decisions.

Book Report

First true crime book I've read since Truman Capote's about Charles Manson. This author actually does the investigations and spent almost 40 years on this one. The result is a plethora of witnesses that Olsen had to interview multiple times and sift through opinions and facts. Spoiler alert: the people in charge of the facts turned out to be the liars. This bombshell happens in the last chapter.

DEI activist was caught offering minority air traffic controller candidates the opportunity to cheat on entry exam. Shelton Snow, an influential figure at the National Black Coalition of the Federal Aviation Employees (NBCFAE), is an air traffic supervisor in New York. *What could possibly go wrong?*

Chinese-owned farmland in America

The federal government's latest data showed that President Joe Biden's deputies exploded the foreign-born share of the United States population by at least 8.3 million, up to a record 15.8 percent, or one in six people. "The overall foreign-born hit 53.3 million ; 15.8 percent of the total U.S. population of 333 million. *Maybe they're picking crops on the Chinese farms?*

There are 700 district court judges. This one is special...he thinks he's more powerful than the President. He just ordered all illegal gang-bangers to be returned to the United States.

James Boasberg, is the Obama appointed judge who was a member of the corrupt FISA court that rubber-stamped the illegal spy warrants against Trump during the Russiagate hoax. Kevin Cline-smith, the FBI attorney who fabricated evidence in those very FISA warrants Boasberg's court rubber-stamped was convicted for that crime, but he never served a day in prison because Boas(s)berg blocked that sentence. BTW: Katherine Boasberg, the judge's daughter, works for a far-left organization that opposes "mass incarceration" of violent criminals and strongly opposes deporting illegals, including violent felons. Since Jimmy can pull these orders out of his butt with no hearing He may demand the astronauts be returned to the space station and Elon must go with them.

Meanwhile, Bernie Sanders is on a speaking tour and requires wearing a mask...for an outdoor speaking tour. Oh, and Democrats have polled AOC as new leader of the Dems.
