

Recipe Corner

Got my *pasta robot* out to make spaghetti to go with baked meatballs involving cup of Parmesan cheese in the mixture. Truly an amazing machine and fun to use. Still wonder what reason my high school had for preventing the guys from Home Economics and typing classes. The kitchen is one of my favorite places as I experiment with the 3000+ recipes I've collected over the years. And then there is the time spent with a keyboard for my blog, articles and this newsletter.

The robot pasta tastes better and cooks faster. I also make my own Marinara sauce.

Tip: NEVER add oil when cooking pasta...that would prevent the sauce from sticking to the pasta. Do add a bit of salt.

Lame Stream Media is ignoring the Durham Report just like they ignored Hunter's laptop. Here are a few more stories they have ignored...

There are 13 confirmed and two suspected bioweapon labs in Ukraine financed by the US State Department...on Russia's border. Which explains why they were targeted by Putin. 🌀 Peter Doocy: "We've been able to confirm that when Sec Def Lloyd Austin went to Capitol Hill to brief senators about the Pentagon's plans and the Biden orders to the military chiefs, they are figuring out how to train Ukrainian forces to fight Russians remotely using video games". 🌀 Men Accused of Illegally Funneling Millions to Hillary Clinton's 2016 Campaign (finally) Go on Trial, Blame Trump in Court 🌀 Photo of "Kyiv Burning" Goes Viral, But It's Actually a Picture of MPLS During a BLM "Peaceful Protest" 🌀 John Kerry Worried Ukraine Crisis Will Take World's Focus Off Climate Change 🌀 President Joe Biden announced Obama appointed Judge Ketanji Brown Jackson as his nominee to replace retiring Justice Breyer but didn't mention the judge's husband is Patrick G. Jackson, the twin brother of Ryan's brother-in-law William Jackson whose wife, Dana, is the sister of Ryan's wife, Janna. Ryan didn't mention that either when he praised her. Of course, Obama's first comment was about the color of her skin. That race card is really getting dog eared. Lindsey Graham, Susan Collins, and Lisa Murkowski voted to confirm her as District Judge. That should be enough to disqualify her! 🌀 The number of families owing no federal income taxes is projected for 2021 at approximately 101.7 million households, or 57.1 percent. 🌀 Lady Trampled by Canadian Police Horses Moving to Florida 🌀 Inflation rises to highest level in 40 years, gas price shooting up.

Book Report

Reacher series on Amazon Prime finally reviewed...big hit. Even the waaay left Hollyweird crowd liked it (with snide remarks about Tom Cruise). Alan Richston (above) perfectly cast and on his way to A-list. One idiot "critic" complained that it was too much like the book! Duh?

Writer's block is the bane of any author. My top three authors apparently never experienced it...until I ran across an article by Stephen Hunter (**Bob Lee Swagger**) that suggests otherwise. I've attached the article for his fans. The other two of my top three are Lee Child (**Reacher**, of course) and C.J. Box (**Joe Pickett**). Lee has turned over the series to his brother Andrew but the latest **Joe Pickett** book is due next week. I'll keep perusing Whatfinger.com for article ideas and fill up the two pages of this newsletter in time for Saturdays.

“Pronoun training? Ain’t nobody got no time for that bullshit!”

Active duty Marines (*including my grandson Shane in this picture*) continue their training unhindered by the bureaucrats Biden has inflicted upon the military. These guys will always be ready to kick ass and take names (*of any survivors*). A few things you will never see in a picture like this...man buns, ponytails, fingernail polish, lipstick, nose rings nor earrings.

You have to love those environmentalists who “protect” all manner of fish and fauna.

Environmentalists have succeeded in getting Feds to shut down four energy producing dams built for power generation, water conservation and flood control. The structures are the four southernmost dams in a string of six constructed in southern Oregon and far northern California producing hydroelectric energy. The project, estimated at nearly \$450 million, would reshape the Klamath River and empty giant reservoirs.

“Think of the children...uhhh...salmon”!

Federal officials have also reversed a decision to allow a South Florida nuclear power plant to continue running for another 30 years by ordering a new review of potential environmental risks, including those posed by “climate change”. The U.S. Nuclear Regulatory Commission issued an order to reverse a 2019 decision by a previous, Republican-led commission to extend Florida Power & Light’s operating license for two reactors at the Turkey Point nuclear power plant until 2052 and 2053, respectively. The plant is on Biscayne Bay, south of Miami. Wonder what would happen if FL Governor DeSantis clipped all the power lines leaving Florida and claim state’s rights to maintain nuclear power for Florida only? He could back that decision with the Florida National Guard he refused to send to Biden’s SOTU.

Meanwhile, Joe Biden Pays Putin \$70 Million Per Day for Oil!

In 2021, the U.S. imported an average of 209,000 barrels per day (bpd) of crude oil and 500,000 bpd of other petroleum products from Russia at about \$100/barrel. US goes through 20million barrels daily...Joe released the oil reserves. I’ll let you do the math as to how long that would keep us from gas lines longer than the ones from Jimmy Carter days. Jimmy also brought us 12% inflation and 21% interest rates.

Maybe Joie sees that as a challenge?

You’re Welcome

Here’s what’s really going on in Ukraine. Ukraine is the Deep States playground. This is where they launder their money, run child trafficking and make bio weapons to release on the world, for depopulation purposes. Keep in mind, Pelosi, Biden and Kerry all have sons on the boards of Ukraines energy companies.

Putin is on our side and working with Trump. Russia is not trying to occupy Ukraine, they are bombing the shit out of the deep states strong hold. No citizens are targeted, only tactical military and bio weapon facilities were targeted.

The US has 11 bio weapon labs in Ukraine that we fund. Putin just took them all out because Gates already announced another pandemic was coming.

The good guys are finally on the offensive and kicking ass but you won’t hear it on fake news. Expect big things with China and Taiwan next

Now THAT’S an opinion that should get some discussions going...except it’s been blocked by all social media.

With the real battle going on within social media, lame stream media and “spontaneous” crowds holding signs that took a week to print...maybe it’s time to ignore all and use your brain.

Until next week...
