

Recipe Corner

oven baked lamb chops

Garlic bits, cilantro and olive oil on each side. Bake in a 350 degree oven for about 15 minutes which will give you a pink center. Anything beyond that and they get a gamey taste.

The baked potato to go with it is scored once lengthways then three times sideways. Into microwave about five minutes, then into the 350 oven until done. Use the last 15 minutes to add the lamb chops. A salad and some wine and you're good to go. Lamb chops cost less than steak and taste gooder. Yes...gooder. English is one of my three languages. The other two are sarcasm and profanity.

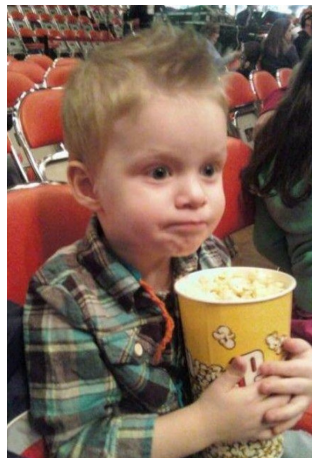

I finally figured out what "chitlins" are but am hesitant to reveal as this idiot may discover you read this newsletter and will bring her full wrath and furry upon you for your racist thoughts.

4.17.2021 #274

*All the news I see fit to print.
Freedom of the press belongs to those who own one.*

What if... anyone rioting or gathering at the scene of any incident would be brought in for questioning as a "witness". Their "testimony" would be included in the official reports and if they were nowhere near at the time of the incident, they can be charged with giving false testimony. The police have a videographer on scene as well as body cameras to prove they were or were not at the scene.

There was one idiot that used a chunk of concrete to dent a police car. He raised it again and was shot with a rubber bullet. Wonder if he was taken into custody and made to pay for the damage to the police car? That means the bystanders caught next to the idiot can also be brought in to "testify". Cameras documenting their presence makes them a witness.

Now for the fun part... Gov Timmy was quoted and recorded as saying he was praying for Wright's family "as our state mourns another life of a Black man taken by law enforcement." That comment means he has some information about the incident and he can now be taken into custody and his "testimony" added to that of the others. Given the number of people brought in for questioning, it may take more than 24 hours to get all of the testimony on record so all would be held in custody. Hopefully, "Reverend" Sharpton is still in town and his comments can also be taken as "testimony".

Even more fun... have the judge handling the intake of these idiots assign the lawyers from the ACLU to represent them. Better yet, the law firms who are "helping" the persecution (sic) of LEO Chauvin at no charge can be assigned to provide the same "help" at no charge.

If this happens... I am going to buy stock as well as lots of popcorn from Orville Redenbacher.

Then we'll use the same tactics for every rubbernecker who slows down driving by an accident.

Bon Mots

You guys are just jealous because the voices only talk to me.

Book Report

Clive Cussler still has most of my attention but I watched the 2019 version of this 1970 movie and was pleasantly surprised by the acting talent of stoner Woody Harrelson. Much gooder explanation of what happened.

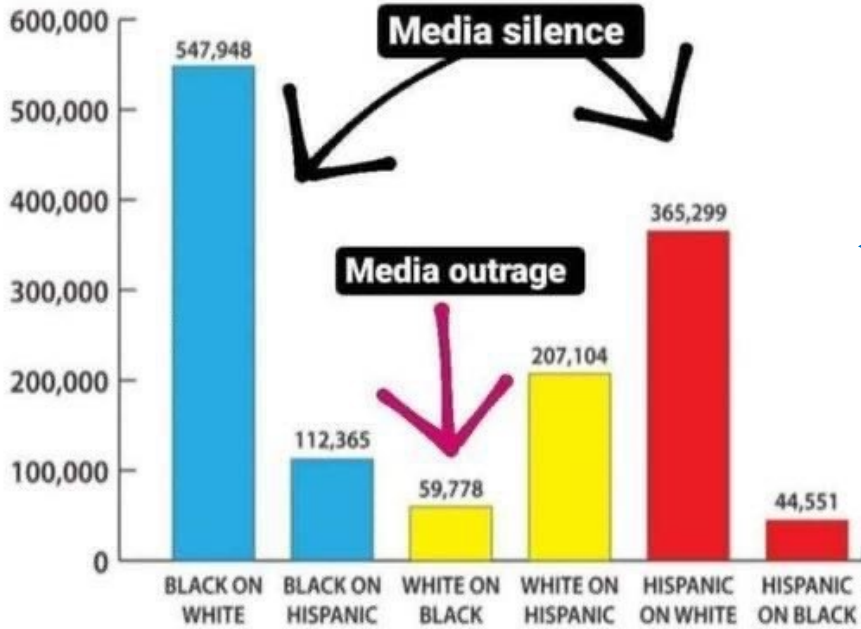

Free movie I never heard of: **Unstoppable** starring Denzel Washington and Chris Pine (*the new Captain Kirk*). Great cinematography and script. Well worth the time.

I'm at the final four **Oregon files** books by Clive Cussler. Do hope his co-authors keep the books coming. You can read out of order since recaps are brief. Will miss him.

INTERRACIAL VIOLENT CRIME INCIDENTS 2018

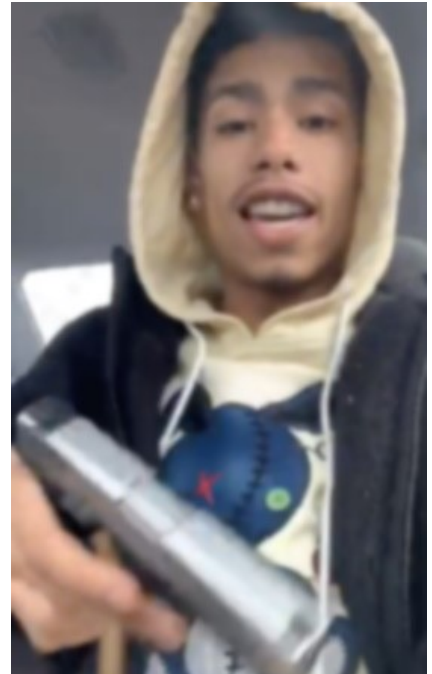

Source: Bureau of Justice Statistics, National Crime Victimization Survey, 2018 (Table 14)

I think I have an explanation of why they use the word "race". They (*meaning the current crop of so called journalists*) can't spell ethnicity. There is only one race...human. You may have noticed the recent reports of UFO's...that's another race (*like Klingons*) doing their every decade survey of our race before they introduce their race. Hispanic and Asian are ethnicities while black and white are skin colors. What would they call a "black" person born in Japan? For further confusion, look up the term PMS chart and you'll find more shades of black than those paint charts at Home Depot. As to white...I'm pink, so using logic, I should be safe from the current white supremacy accusations. Maybe I should apologize for using the word "logic"? Seems to be another word "journalists" have not been able to understand, let alone spell. The biggest mistake these morons are making is summed up succinctly in the following cartoon (meme?).

Mal Mots

Scientists say the universe is made of protons, neutrons and electrons. They forgot to mention morons. You're welcome.

BTW: Lame Stream Liars have been reporting that Duane's stop by MN police was for out of date license tabs. Nope. Warrant for first degree felony for armed robbery...and like Saint George, involving a female victim. He was real proud of that gun he was not allowed to own. Guess he couldn't read the gun laws in MN? Maybe his mom should sue the school system? Maybe Biden should have paid for Duane's computer for zoom lessons during Gov Timmy's shutdown of the MN schools?
