

The Minneapolis City Council unanimously agreed Thursday to amend the city's noise ordinance, which had prevented dawn and late evening calls at certain times of the year due to noise restrictions. "The Constitution doesn't sleep at night," said Jaylani Hussein, executive director of the MN chapter of the Council on American-Islamic Relations, after the vote adding that the action in Minneapolis shows the world that a "nation founded on freedom of religion makes good on its promise."

Minneapolis has had a growing population of East African immigrants since at least the 1990s, and mosques now are common. Three of 13 members of the council identify as Muslim. Prayers are said when light appears at dawn, at noon, at mid- to late afternoon, at sunset and when the night sky appears... complete with bullhorns.

Quasimodo and church bells same time as the mosques?

"In unity with our Muslim brothers and sisters, let us join their joyful noise at the same times in praise of God."

(But only in Minneapolis and earplugs go on sale in stores not yet closed because of shoplifting and gunfights in their parking lots.)

The Frank Report

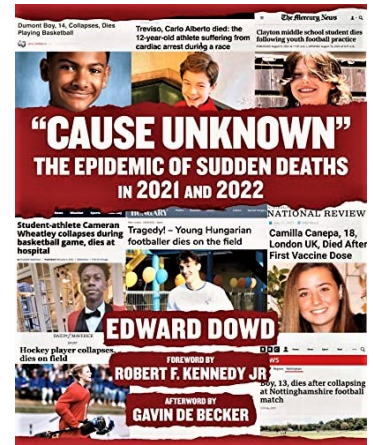

4.22.2023 #379

All the news I see fit to print.

Freedom of the press belongs to those who own one.

Manhattan district attorney Alvin Bragg is laser focused on President Trump and missed this? *"Nearly a third of all shoplifting arrests in the city last year involved just 327 people. Businesses say they have little defense. Collectively, they were arrested and rearrested more than 6,000 times"*, Police Commissioner Keechant Sewell said. The 6,000 arrests are just the times when the 327 got caught. Bragg says he is dedicated to showing that no man is above the law, and here are 327 people who appear to be above the law.

Under our constitutional system, federal power is the exception, not the rule. As James Madison, the "Father of the Constitution", wrote in Federalist Number 45, "The powers delegated by the proposed Constitution to the Federal government are few and defined. Those which are to remain in the State governments are numerous and indefinite." The Constitution, the writings of the Founders, and the notes from the ratification conventions establish that every State that ratified the Constitution knew it was doing so with the assurance that it was retaining the vast bulk of its sovereignty, with full authority to nullify any federal law the State believed was outside the scope of its delegated authority. Without this assurance, the Constitution would never have been ratified. With states rights the key, it is interesting that four Democrat party legislators have switched to the Republican party in just the last two months. **Bottom line:** the Constitution was adopted to protect citizens from the government even though Democrats seem to think it protects their government from us. When states allow people like Alvin Bragg to circumvent their laws, that's on them. We're seeing it in Filthydelphia, Baltimore, Chicago and Minneapolis. It's going to take pain for some people to realize something's wrong and start using common sense when they vote...and know who the hell they are voting for.

Book Report

Third in the free ebooks documents the huge and tragic deaths caused...not by COVID...but by the vaccines made mandatory by politicians and mandated by medical slaves of Big Pharma.

Vaccine sales increased from \$127.6 billion in 2021 to \$202.6 billion in 2022. Compare this to just \$25 billion in 2010. COVID-19 vaccines are the largest element of that growth, representing roughly two-thirds of the market.

The COVID-19 pandemic had a substantial impact on the vaccine delivery device market which grew to over five billion dollars.

The life insurance industry had a total asset value of around seven trillion dollars in 2018. Big Pharma in the United States was valued around 2.8 trillion U.S. dollars.

These two behemoths are going to clash soon as this book reported 60,000 excess deaths of 18-64 healthy millennials. Every cause of death was labeled "all cause mortality" and was 40% higher than normal. The insurance companies use these total mortality rates to establish premium rates. Common sense tells them (and us) what the hell actually happened.

QUOTES**

*Show respect for coffee.
Don't call it a cup of Joe.*

*If you follow The Science
you'll find The Money.*

*Never argue with a woman.
If you win, it gets worse.*

*When life hands you lemons
hand them back.
You deserve wine.*

*Folks deciding who they are
should decide
who they'll never be again.*

*Lame Stream Media
"journalists" paid for a
college degree so they could
report about "her testicles".*

*If your glass is half full
use a smaller glass
and quit bitching.*

*Politicians take note: when
we run out of patience,
there will be hot tar and
fluffy feathers.*

*There is an invention
that can turn
thoughts into speech.
It's called alcohol.*

*You're never too old
to learn something stupid.*

*People who share their
political views with you...
...never want you to share
yours with them.*

*Got hungry late last night.
Did a search for food.
All I found were ingredients.*

*When you're dead,
you don't know
you're dead.
The pain is felt by others.
Same thing happens
when you're stupid.*

Democrat Dianne Feinstein employed a Chinese spy as a driver for years. Democrat Eric Swalwell had a romantic tryst with Fang Fang, the Chinese spy. And now it looks like more Democrats have been hanging out with more Chinese spies. This time it's one of the Chinese operatives arrested by the FBI recently for running an illegal Chinese police station.

But wait...there's more:

Fox News has settled the defamation lawsuit brought against it by Dominion Voting Systems for \$787.5 million. Even before the settlement, Staple Street's investment in Dominion had been successful. Fox said in a court filing that Dominion was valued at around \$226 million in the run-up to the 2020 election, citing exhibits it did not make public.

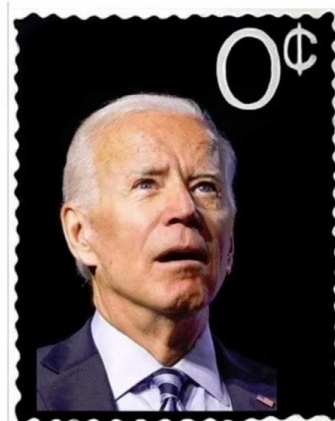

That was up from the \$80 million valuation when the acquisition of Dominion by Staple was clinched in 2018.

UBS Securities LLC, owns \$400 million in shares Dominion's parent company, Staple Street Capital LLC. While it appears three of the four board members of that subsidiary's board are Chinese and could represent Chinese investors, shareholder information is private, so it is unknown if China or any other government owns shares. The parent company, UBS, does substantial business in China and is partial owner of a China-based firm, UBS Securities Co. Ltd., which did not buy the Staple Street shares.

So Fox now funds Dominion's 2024 roll out of new election machines and software, leaving enough for ample contributions to elections of targeted secretaries of state.

Rupert Murdoch did NOT want to be called to testify. He was actively working against Trump during both elections but was on org charts of media consortiums teaming up with Secretaries of State who were working to change as many state laws as possible to enable ballot harvesting etc.

BTW: Border Patrol agents apprehended 90 Chinese nationals in a single day with a total of 1,667 Chinese nationals apprehended at one Texas location with 91% of them single adults. Border Patrol has a 20% apprehension rate. I'll let you do the math and try to figure out what's going on.

The price of postage stamps is poised to increase in July for the second time this year, the 17th rate change since 2000.

If the 3-cent increase is approved by the Postal Regulatory Commission, it would be the shortest time between increases in the Postal Service's history.

H/T to Bill for meme

Here at home:

87 degrees record high on a Thursday with 35 degree high three days later. And then two inches of snow. But always 72 degrees inside. Gotta love MN.

Chirping sound sent me on the hunt for smoke alarm needing new battery. Wearing hearing aids makes that a daunting task. Was a bird outside.

Admonished The Boys for their dereliction of duty.
