

## Beer vs Ferrari

Woman:

Do you drink beer?

Man:

Yes

Woman:

How many beers a day?

Man:

Usually about three.

Woman:

How much do you pay per beer?

Man:

\$5.00 which includes a tip

Woman:

And how long have you been drinking?

Man:

About 20 years, I suppose

Woman:

So a beer costs \$5 and you have 3 beers a day which puts your spending each month at \$450.

In one year, it would be \$5400 ...correct?

Man:

Correct

Woman:

If in one year you spend \$5,400, not accounting for inflation, the past 20 years puts your spending at \$108,000, correct?

Man:

Correct

Woman:

Do you know that if you didn't drink so much beer, that money put in an interest savings account and after accounting for compound interest for the past 20 years, you could have now bought a Ferrari?

Man:

Do you drink beer?

Woman:

No

Man:

Where's your Ferrari?

*Tip: this works as well with power tools, guns, fishing gear and the cost of the divorce lawyer.*

Obama's "transformation of America" continues with brazen, in your face demonstrations of the hate he and his acolytes push...totally supported by the Lame Stream Media.

America was founded as a Republic created to protect its citizens from government. The judiciary, thousands of lawyers, with the Supreme Court at the top of that pyramid, was designed to keep the power hungry politicians in check. That was one of the first impediments the Uniparty attacked including members at the top of the legal pyramid who "interpret" rather than apply our laws. The First and Second amendments give our Constitution and Bill of Rights a second tier of protection if the judiciary fails. The Supreme Court has taken a step forward with the rejection of Roe vs Wade which was a federal mandate about abortion. Of course, the Democrats lied via the Lame Stream Media by ignoring the main reason it was rejected: abortion is a state issue...not federal. States can mandate the specifics of any abortion law...BUT it will apply ONLY to that state. Democrats hate state power since that would complicate their goal of controlling all with just federal power. The Roe vs Wade decision means they would have to take control over all states and territories. Soros doesn't have that much money to buy all the states. He's focused on the federal level. He is using a few state attorneys general to harass Trump, but now that Trump has more money than Soros, things are getting very interesting...and dangerous. When Democrats lose, they start playing outside the legal lines. With the federal power in the hands of RINOs and the Uniparty, there will be nothing left but the First...and then the Second amendment.

Key point to make on my rant above: fight the fed from taking state issues from them. Stay focused on your state and local politicians to make sure they are in sync with their constituents. It's the easiest way to defeat the Uniparty.

***If you don't know, nor have communicated with,  
your local and state politicians...get busy!***

## Book Report

After 13 *Gray Man* novels, Mark introduces a new hero, *Josh Duffy*. Totally different from the *Gray Man* but just as badass, the debut has him protecting UN VIP's. "Duff" finds he was hired *because* of his missing leg even though he thought he had hidden it in the interview. I know, that's confusing but I can't tell you more without spoiling the plot...which is great! The second Duff book will be out in June. I pre-ordered it so I don't forget. That happens a lot these days, which is a good thing because a second reading months later and I get twice the insight and value.

Checked the TV to compare with internet weather reports. Both said I was gonna die AND the TV offered four ads a minute for Rx to fix it. They also said I was to check with my doctor. Can I charge them for the Dr visit bill?

Pfizer’s 2020 revenue was \$41.6 billion. As the vaccines rolled out around the world, that figure doubled to \$81.2 billion in 2021. With the booster added because of new variants, their revenue was even higher, over \$100 billion in 2022. Revenue declined in 2023 as demand fell for COVID vaccines as the government stopped buying them because the Fauci Fraud was recognized by the public despite the Lame Stream Media’s litany of conspiracy theories that they began to admit were facts.. Pfizer’s 2023 revenue was over \$58 billion, even more than pre-COVID.

Politicians reap the benefits of this new revenue and are hell bent to convert it to power, specifically over the Big Pharma industry. The Lame Stream Media are silent because they are getting 75% of their revenue from Big Pharma advertising. It’s hit me personally as Allina has pushed the DEI (*diversity, equity inclusion*) idiocy with their president asserting her pronouns in their annual report and the emphasis from their DEI executive, also pushing her pronouns. The Allina annual report opens with much gobbledygook about what DEI means for Allina. For me, it means they have shut down the convenient messages I could trade with my doctor about health care issues, which Allina now interrupts and claims I will need an appointment if I want to reach my doctor. At my age, I’m more than a dozen years past the average shelf life of a male in America. I just want whatever will keep me vertical and taking nourishment until something sneaks up and kills me. My doctor understands that and has patiently (*pun intended*) taken her best shots to modify my lifestyle. Meanwhile, I’m getting great care from the VA and just may teach Allina my new pronoun: *former customer*.

**Politicians broke this and  
now they want to “fix” it?**
