

Recipe Corner
Roast Beef Hash

Use good baking potatoes peeled and chopped into cubes about 1/2 inch each. Fry in butter and olive oil at low heat about ten minutes. Add chopped sweet onion and some garlic bits. After about five minutes, add chopped sweet peppers. Another five minutes (*when potatoes start to brown*) add roast beef cubed at 1/2 inch again. I start with rare pieces so they won't overcook. This cut of meat (*eye round*) is tender to begin with so no real problem overcooking. Daughter Susan likes to add ketchup at the end...or when it's on your plate.

Key to success is low, slow heat.

Can't believe they ate the whole thing...transitioning into once a month family dinner with the kids.

Found an eleven pound slab of baby back ribs at Sam's Club to experiment with using one of my favorite recipes. Kids demolished it. Used a dry rub recipe a la Kansas City rib recipe (*attached*) and it turned out great. Love my new gas stove with computer assisted controls and loud timer to keep me focused on progress. Daughter Margaret added potato salad and her famous baked beans.

Son William scored two weeks of doggy bags from previous kitchen projects so we share avoidance of cooking for just one. He loves his new job in Hutchinson, MN.

THE FRANK REPORT

5.25.2019 #175

*All the news I see fit to print.
Freedom of the press belongs to those who own one.*

They spit on soldiers returning from Vietnam, calling them "Baby Killers."

Fighting for the right to kill babies.

That was then...

...this is now.

Ran into these snowflakes in 1965 at SF airport on my way to second tour in Vietnam. The Navy had us travel in civilian clothes to avoid them. John Kerry was part of this crowd grandstanding all the way to running for president. Makes you shudder how far the pendulum has swung. Now we learn that the head of the CIA (*Brennan*) and head of the FBI (*Comey*) were members of the Communist Party of the USA at the same time. Hiding in plain sight is the key. Valerie Jarret's daughter is a DOJ correspondent at CNN. Yeah, she's unbiased!

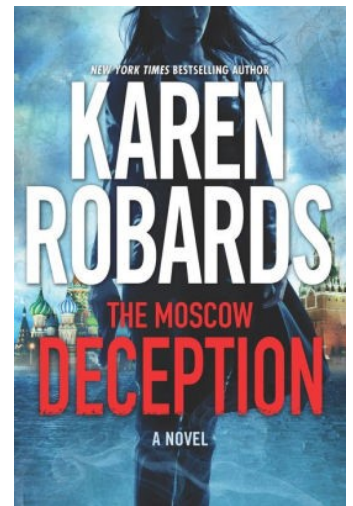

Speaking of bias...Adam Schiff was supported by Soros to gain his Congressional seat (CA 2013). If that wasn't enough, (**his sister?**) Melissa Schiff is married to George Soros' son Robert. And that new Republican, Justin Amash that Schiff has embraced because he calls for impeachment? Seems he, his Palestinian father and brother are all co-owners of a Chinese factory. Duh?

Wait! There's more: John Kerry's daughter Vanessa is married to an Iranian national and physician. Best man at the ceremony was the son of **Mohammad Zarif***, Iran's Minister of Foreign Affairs. Zarif was also Kerry's chief counterpart in the nuclear deal negotiations.

*More about **Zarif** next page...

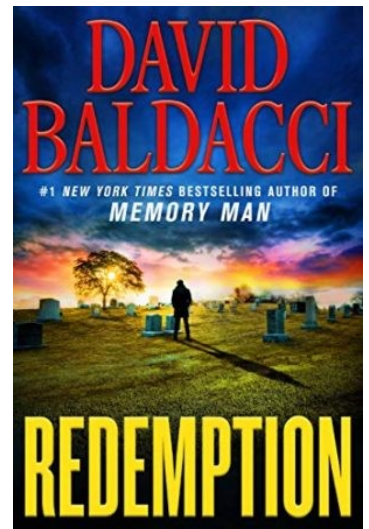

Bon Mots

*God created man and woman.
The Democrats invented
all the other genders.*

Book Report

Yes, Robards female Jack Reacher character is worth the time. This is the second of three. Tracking down the first to figure out the CIA DNA plot element. Not fully explained in #2 nor #3.

This one is very scary should the plot twist at end be even close to being true. Baldacci always delivers a great read. The memory man is a unique element and holds up in series.

-more-

Mark Levin called out the hypocrisy of the Democrats after Sen. Dianne Feinstein, was caught on the phone with Iranian **Foreign Minister Javad Zarif** earlier Thursday, and the media said nothing.

"He's the foreign minister to an enemy state that seeks to attack American military personnel in the Middle East, that seeks to put nuclear warheads on ICBMs so they can reach the United States. It is a terrorist regime, an Islamo-Nazi regime in Tehran, that has killed Americans, that funds Hezbollah to kill Americans, that funds Hamas to kill, and is a threat to our national security, obviously," Levin said. "What in the hell is the ranking Democrat on the Senate Intelligence Committee doing talking on an iPhone around the Capitol to Javad Zarif?"

"What is it with these Democrats fronting for this Islamo-Nazi regime that wants to kill Americans and Jews in Israel? You've got Frankenfeinstein, you've got ... John Kerry — or the real Frankenstein — giving aid and comfort to the enemy! It's not enough that they released \$150 billion to this regime; now they're giving it advice, against the president of the United States. You want to talk about the Logan Act? Collusion?"

Lasers were once a scientific breakthrough. Now we use them for a cat's amusement.

Computers were once a scientific breakthrough. Now we use them to look at cats.

Conclusion: science was invented for cats.

Meanwhile...

\$830,977-a-year Poop Patrol actively hunts down and cleans up human waste. The poop patrollers earn \$71,760 a year, which swells to \$184,678 with mandated benefits. At the same time, the SF Department of Public Health has an additional \$700,000 set aside for a 10-member, needle cleanup squad, complete with it's own minivan.

Nancy's more focused on Russians instead of infrastructure.

The Old Man and The Sea

Really old! John's Birthday is today, the 25th.

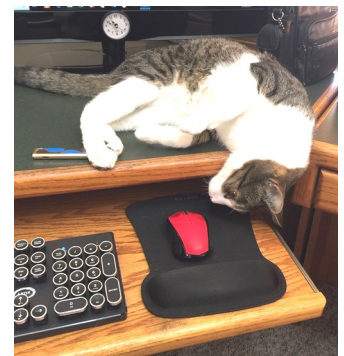

jmalonelaw@gmail.com

I added up his time sheets and discovered he is older than I am!

Been a while since I've been able to post pictures of The Boys. My latest trick is to sneak up on them using the camera angle Scott Benson taught me. Caught Peter sleeping...notice the ears bent back a bit trying to figure out if he should swat me or ignore me. If his ears were all the way back... instant death.

Paul is the clown always ready to suggest a different perspective on what I'm doing. He really likes the mouse and has frequently pushed it off my desk to the floor.
