

**Household tip:**

Make sure your ceiling fan is rotating counter clockwise in summer. Also good time to clean the blades when you get up there to flip the switch. I didn't and got a basket full of dust bunnies.

**When you laugh at a kid's joke, that kid will tell that exact same joke at slightly louder volume a thousand times in a row.**

**Same thing happens when a politician tells a lie that anyone believes.**

**Great idea for a convenience store. The Government is certainly making a lot of money with it.**

The MN Legislature is in recess until January 2022.

Here's what they have been up to: [www.leg.mn.gov](http://www.leg.mn.gov).

Dig into this website and you'll find a summary by subject of the new laws they are "working" on or have passed. This last session had 37 bills for the topic of firearms and dangerous weapons. And you thought they had enough gun laws already on the books? Read some of these bills and you'll find a common theme...more taxes. Hell, most of the others too. **Here's a reminder for politicians:**

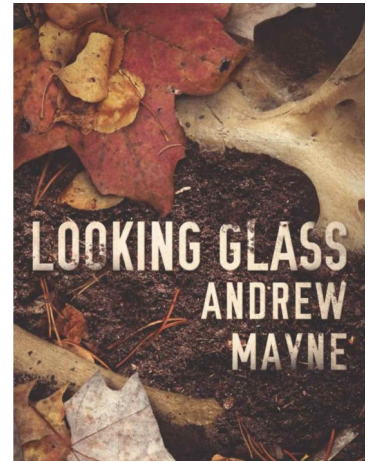

**As the government continues to write complicated laws, regulations and issue edicts for citizens, the citizens should remind them of the simple and easy to read laws the citizens have written for the government.**

**It's becoming more evident that we need more citizens in government and fewer politicians.**

Another **Prof. Theo Cray** thriller as a follow-up to **The Naturalist** (last week). This one dips into Mayne's extensive background with magic. Ends with a hint at a conspiracy theory and a special lab he starts. Very technical details in the plot that embellishes rather than detracts from the dialogue. This guy is good!

**There are so many idiots in this world, it's hard to keep a civil tongue when you run across them. A specific type of idiot anathema to me is the customer "service" rep who doesn't understand the meaning of those words. I maintain low blood pressure by making sure I send a letter to any company when I run across the rare example of what "service" is all about. That "attaboy" letter (copied to the employee as well as the corporate headquarters) cancels out at least ten "dumbshits" you'll encounter. You'll feel better and so will the customer service rep who knows what they are doing.**

### **Thoughts While Thinking**

Last week, Iran's largest naval ship caught fire and sank. One of their largest oil refineries caught fire and exploded. Then one of their fighter jets ejected the two pilots and killed them as it rolled down the runway.

A large fire broke out at a steel factory in Iran.

Has anyone seen Rambo lately?

Those people, specially politicians, who were hollering at me to wear a face diaper...should be forced to replace their face diaper with duct tape.

May 2021 jobs report shows leisure& hospitality and government the largest increase. Guess the others are still collecting unemployment checks from the government instead of looking for a job. Maybe that's why we need more government employees to send the checks?

Construction jobs are integral part of Biden's infrastructure proposal. Unions have lost membership while donating solely to Democrats. Two-thirds of these jobs will go to nonunion workers who dominate the construction markets in most states. Karma?

Los Angeles County Sheriff Alex Villanueva revealed last week that homicides were up 95% this year over the same period in 2020 and said his department would issue more concealed carry permits to let citizens defend themselves. The Biden administration has cited guns as the problem. Who should we believe? (duh!)

Runaway inflation has caused the price of making movies and TV shows to skyrocket. Plots bent left repel viewers which leads to less ad revenue.  
More Karma?

Gas station in Mendocino, about 150 miles north of San Francisco , is currently charging \$6.73 per gallon of regular, the San Francisco Gate reports. The average price of gas in Los Angeles County Thursday was \$4.23 per gallon, according to AAA. California's average gas price sits at \$4.20 per gallon, while the nationwide average is at \$3.04. Was \$1.79 under Trump. Picture of Trump...with caption "miss me yet?" ...should be placed at all gas stations?

NBC's Today show praised a high school valedictorian for using her graduation speech to launch into a pro-abortion tirade. Bet there's a line of guys at her door ready to give her a reason for an abortion.  
Unintended consequences?

Maybe we should thank her for sharing her extensive life experiences?

I have trouble with the coloreds but the whites are no problem. For the woke culture grasping their pearls...I'm talking about my laundry.

Apparently only black lives matter? When are these people going to realize skin color is not the character of anyone. Hell, I'm pink, not white. Maybe I should holler racism?

#### **Quick test:**

Make a list of ten people you admire.

Now write color of their skin next to their name.

Had to think about it, didn't you?

**A two-megawatt windmill is made up of 260 tons of steel that required 300 tons or iron ore and 170 tons of coking coal, all mined, transported and produced by hydrocarbons. A windmill could spin until it falls apart and never generate as much energy as was invested in building it.**

Government control of the medical industry is starting to show dangerous results. Emergency meetings at CDC and NHIH due to vaccine side effects that are killing people while schools are forcing students to get the shot but not their staff nor teachers. Biden says we're safe. "Dr." Jill says we're safe. Free marijuana if you get the shot?  
How about free burial services?

**Until next week...**
