

Recipe Corner

Beef Wellington on left and the corn dog on the right.

Same recipe but different ingredients.

Thanks to Bidenomics, the corn dog costs today what the Beef Wellington cost just four years ago.

Yesterday was flag day.

The American flag is a symbol of national pride and freedom, but when flown upside down, it can have a different meaning. According to the United States Flag Code, flying the flag upside down is typically a sign of distress or extreme emergency, indicating a situation of dire peril to life or property.

Yes, that's my flag.

It's free speech to burn it but hate speech for flags representing perversions.

Go figure!

All the news I see fit to print.

Freedom of the press belongs to those who own one.

The United States Court of Appeals for the Ninth Circuit has delivered a seismic decision that could reshape public health policy across the nation. The case revolved around COVID-19 vaccination policy, which required all employees to be fully vaccinated against COVID-19 by a specified deadline. CDC Director Walensky admitted, in Feb, 2022 that the shots didn't cure, prevent infection or stop the spread. Then they changed the definition of a vaccine to say it mitigates the effects of the virus or disease.

Just a few examples of what the Biden administration and the Lame Stream Media has subjected us to. Then add the bastardization of the justice system and total chaos reigns over common sense. In the meantime, the Republicans continue sending strongly worded letters while Trump's lawyers are indicted along with most of the conservatives on the internet...e.g. Steve Bannon.

Book Report

The plot involves terrorists using airplanes as a weapon and political parties using lawfare and election cheating with computers changing ballots to favor one candidate.

No...the author was not lazy.

He wrote this in 1979!

His novel *Tears of Autumn* (5.11.2024 newsletter book report review) explained the reason JFK was assassinated and who did it.

McCarthy's novels are presented as fiction, but, given his ten year career as a deep cover agent for the CIA, makes you wonder how his books made it to the public. Most of them were published as paperbacks. Many of them are finding the spotlight again as hardcover and eBooks.

Besides the chilling prescience of the plots, his character development is an added great nuance to the plots. The title of this one explains the evil done by the opponents as almost forgivable. He explains the rationale of the end justifying the means. *His bio and list of books also attached.*

Audrey Hale, the 28-year-old woman who believed she was a man and shot and killed six at a Nashville Christian school on March 27, 2023, wanted to return home after the attack and kill her father. She used funds from a federal Pell Grant to buy the guns she used instead of using it for college tuition. Wonder if Biden is going to forgive that loan? Found that out after feds were forced to release her "manifesto". Maybe that's why it took over a year to force feds to release it after numerous FOIA lawsuits?

Unintended consequences?

Teachers with a conceal carry permit are being allowed to carry at school in several states...and warning signs about armed teachers posted. If terrorists faced armed resistance rather than a sign telling them no guns are allowed, even the dumbest ones would think twice about their target. If not, we would save the cost of arrest and trial and Teacher of the Year awards would mean more.
