

## Recipe Corner

### Brain Food?

The last Johnny Carson **The Tonight Show** was seen by 50 million people. The combined ratings of every single show airing at 11 pm eastern time on NBC, CBS, ABC, MSNBC, CNN and FOX NEWS is still a fraction of Johnny Carson's in his heyday.

From April 5 to May 3, **"Gutfeld!"** averaged 1.515 million viewers while "The Tonight Show" averaged 1.395 million viewers. The Fox News program is already competitive to Stephen Colbert's "The Late Show" and "Jimmy Kimmel Live," which had an average 1.991 million and 1.579 million viewers respectively. When there was no Youtube, Netflix or Google: Carson never subjected his audience to his own political views, not once in the decades of The Tonight Show. So it's a fact that mixing politics with "entertainment" is a recipe for disaster.

### Time to cut the cord?

NBC charges about \$640,000,00 for an ad. Compare that with the cost of sending an ad using spam emails:

**US\$ 99 - 1 MILLION**  
**US\$ 750 - 200 MILLION**

They (*Corbetsoftware*) will even create the ad for you as part of the cost. Now you know why social media collects (and sells) your email address.

### My Favorite Conspiracy Theories:

Kamala Harris selected because they know she will screw up and be forced to resign. Replaced by Hitlery Klingon as VP and then Joe retired using the 25th amendment. Hitlery assumes presidency and Bill Clinton selected as new VP to add "credibility" to the new leaders. Nancy Puglosi goes through four gavels banging away to avoid very vocal House rejection of the new regime. Meanwhile, Bill Barr has been working behind the scenes with Mike Lindell to prove massive election fraud and gathers enough state legislative support to declare Trump actual winner of the 2020 presidential election. Barr's proof includes GOP actual control of the Senate and the House giving the now in control GOP Congress the ability to confirm that the 2nd amendment nullifies any gun law. Realizing that the 434 million guns and almost 10 billion rounds of ammunition in the hands of Patriot citizens more than Trumps (sic) the blackmail information the Chinese have on the supreme court members so they back off and SCOTUS rules in favor of the new Trump led government. The new US Attorney General, Michael Flynn, is instrumental in the release of the Durham report, due over a year ago chronicling FISA abuse by the "Just Us" Dept along with a sidebar identifying the various non-extradition countries FBI and CIA officials have escaped to. Diplomatic negotiations centered on foreign aid to those countries is now underway. The remaining FBI and CIA budgets are used to finish the border wall while hiring over a thousand ICE agents to track down and remove the hundreds of thousands of illegal aliens who poured into the country during the brief but chaotic Biden regime. The CIA black budget is uncovered and used to give all active police officers a huge permanent raise in their salaries. Congressman Jim Jordan is elected Speaker of the House and Nancy retires to her winery in CA only to find it has been destroyed by cicadas and her husband under arrest for illicit insider trading. Their \$235 million assets are confiscated with proceeds used to disinfect the Nadler and Schiff offices.

### Book Report

Free eBook from Amazon (*intro of this author*) and I'm adding her to my list. Not a fan of multiple first person narrative characters but she manages to make it work. Very difficult to do yet is essential to the plot.

His debut novel and it is a wild ride. Don't miss this one. Had me up till 3am to find out how the hero was going to figure out why the entire world was literally trying to kill him.

*"The United States accounts, as all of you know, for less than 15 percent of carbon emissions. The rest of the world accounts for 85 percent. That's why I kept my commitment to rejoin the Paris Accord, because if we do everything perfectly, it's not going to matter."* president\* Biden

**What the hell does that mean?**

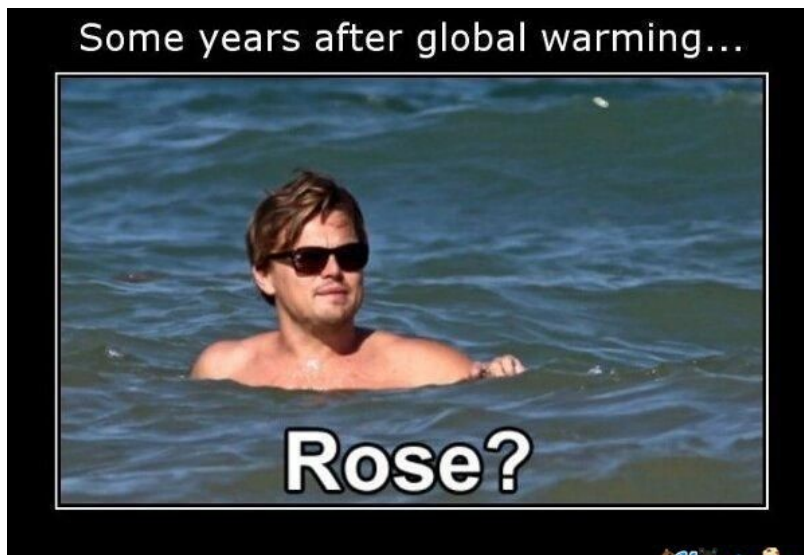

Climate extremists admit that no one knows how much human activity may be responsible for the increase in carbon dioxide levels in the atmosphere.

**Now we know.**

During the Fauci pandemic, auto traffic sharply declined, factories shut down, restaurants were shuttered, airplane flights became almost non-existent, borders were closed, and schools and offices were locked down worldwide. Net result? The atmosphere remained virtually unchanged.

The message could not be clearer: Drastic, unprecedented cutbacks in carbon dioxide emissions from human activity will do nothing to combat what has been an increase of 1.8 degrees Fahrenheit in average global temperature since before the Industrial Revolution.

**president\* Biden's entire climate agenda would add trillions to the U.S. government budget based on a myth.**

You are one of them.  
You're welcome.**

I hope you're not waiting to see what POTUS Trump will do. It's time for all of us to do what we can to confront the idiots that seem to have all of the attention. Cut the cord. Find news sources outside the Lame Stream Media. Facebook, Instagram and other social media should see you leave. Hollyweird can keep their trash and wonder why you won't buy it. Confront the mask Karens with your own data about how face diapers are as bad as you thought. Hold off on the vaccine until someone wanting to jab you will take responsibility if anything goes wrong. Contact your congress critter and let them know how stupid the whole Washington DC scene makes you laugh...yes, laugh. Humor and satire are the greatest weapons against these ego centric idiots. That includes the GOP who takes our money and then gives us idiots like Paul Ryan. Most important weapon you have is your email list and the courage to let people know how you stand on the issues. Lord knows the idiots aren't shy about getting in your face. You'll be pleasantly surprised when you find the majority agree with you.

**Until next week...**
