

Recipe Corner

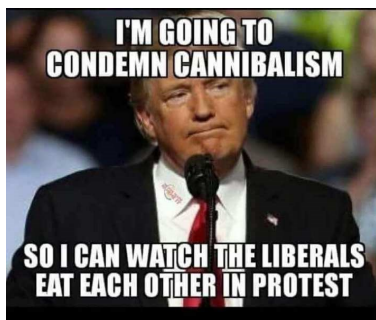

Corn from Cob to Freezer

(This recipe courtesy of son Christopher)

Shuck the dozen corn getting all the silk out as you can. Cut the corn from the cob using a very sharp knife that will reach into the cob so you don't lose any of the corn. Pre heat oven to 325 degrees. Add pint of half and half milk. Add a quarter pound stick of butter. Place in oven covered for an hour. Let it cool for a bit then refrigerate for about an hour. Then you can spoon the corn into plastic freezer bags...I use two cups per bag. This time of year the farmer's markets are overrun with corn so you should be able to get lots at prices that will more than justify this recipe.

Side Dish suggestion:

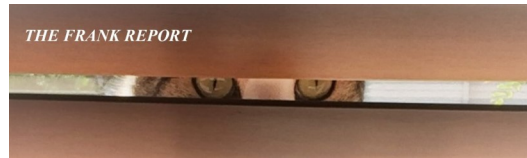

Boil cup of rice in two cups of chicken broth. When rice is almost done, add a package of the frozen corn and stir until all liquid boils out. Any leftover of this side dish works great with fried rice recipes too.

THE FRANK REPORT

8.24.2019 #188

All the news I see fit to print.
Freedom of the press belongs to those who own one.

5 Facts That Gun Control Advocates Hate

- 1  **92%** of mass shootings since 2009 occurred in "gun free" zones.
- 2  A 2013 U.S. Department of Justice study found that gun violence had fallen by nearly **50%** since its 1993 peak.
- 3  The so-called "gun show loophole" is a myth. It does not exist. There is no loophole in federal law that specifically exempts gun show transactions from any other laws normally applied to gun sales. Not one.
- 4  Guns are used **2.5 million** times a year in self-defense in USA.
- 5  The following countries enacted gun bans before committing genocide in the 20th Century: Ottoman Turkey, Soviet Union, Nazi Germany, China, Guatemala, Uganda, Cambodia.

New Cell Phone Law

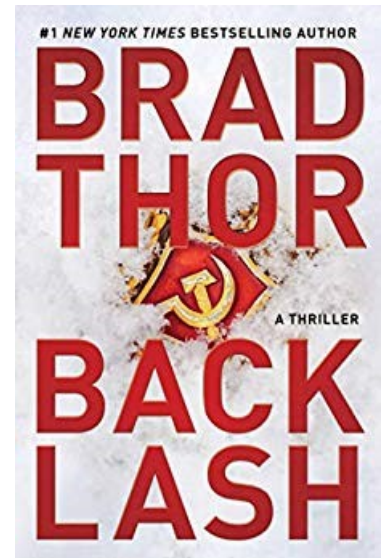

Marietta, GA, as MN has, passed a no cell phone behind the wheel when driving a car law. They dressed up police as road workers with walkie talkies to call up to other police cars hiding to pull over drivers who are seen on cell phones going thru intersections. In two hours, time they pulled over almost 180 drivers; some drivers on warrants and some did not even have a driver's license and some criminals.

I know...I know...should be *sank*. Not my meme.

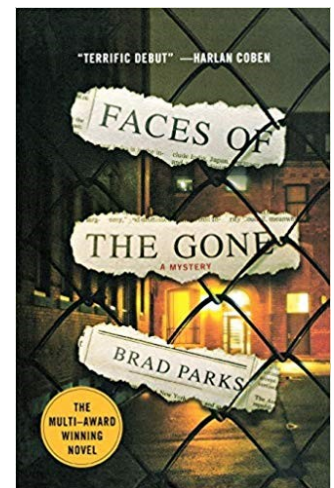

Bon Mots

If glasses make you look smart, why do you have to fail a test to get them?

Book Report

Can't believe this is my first **Scot Harvath** hero book. Thor is one of (**Reacher**) Lee Child's favorite authors. Super secret agent plots with in depth info on the training that made the heroics possible.

Parks debut novel...and they keep getting better. **Carter Ross**, investigative reporter solves crimes while dodging danger.

-more-

Finished the bookcase and hung on wall like the DVD cabinet I made. Have started the collection of debut novels. Some are no longer available in hardcover and if you can find them, they are pricey. **Neon Rain** is a 1987 debut novel of James Lee Burke and goes for about \$200.00 in a used book store. Anybody visiting used book shops...keep an eye out for me. Maybe I have stumbled upon one of those hobbies like baseball cards that play out well. Dr. Fleming's book **Exposure** is there...waiting for **Dan Hauser** (friend of Dr. Fleming) to finish his...got to read a couple of draft chapters and looking forward to its publication. If you note the eBook at the right on the top shelf (red arrow): there are over 100 books in that tablet. I will spend the few extra bucks in the future for hardcover...just feels better reading a dead tree product. Speaking of dead trees...

Looks like those popcorn seeds we ordered from Japan are working. Stalks are over six feet high. Shipping cost more than the seeds. Couldn't find white popcorn seeds anywhere else. Racist?

There's an experimental artichoke plant somewhere in there. If it makes it, there's going to be lots more next year. Beautiful flower that turns into son Chris' favorite snack (*lots of butter involved*). Grew dozens in Oregon.

...I miss the log splitter Ralph Schultz designed and built in 1976 to run off the PTO of my 1939 John Deere tractor. With the kid's help, we stacked 7-8 full cords on the farm. I also miss the fireplace but not the soot.
