There are people who call themselves patriots who would cheer the following scenario:

*All the news I see fit to print.  
Freedom of the press belongs to those who own one.*

**Kamala gets the cabinet to use the 25th amendment to get rid of joe.**

**Book Report**

This 2018 book is focused on the elites and how they ignored Americans who responded with the election of Donald Trump. Fascinating overview of how the consolidation of power will explode in their faces.

**Kamala becomes president and appoints Hillary vice president. Hillary uses the 25th amendment (and threats of Arkancide) to get rid of Kamala.**

**Hillary becomes president and appoints her dimwit daughter Chelsea vice president.**

THIRTY YEARS IN AMERICAN JOURNALISM

**Of course, even the evil people involved in this scenario could never match the Machiavellian mind of another denizen of the Deep Swamp.**

Hilarious and sometimes sad narrative of his journey through the self destruction of the news media.

**-more-**

	<p><b>Pfizer:</b> \$4.7 billion in fines for false claims, drug and medical equipment safety violations, off-label promotion, corrupt practices, kickbacks, and bribery.</p>
	<p><b>Moderna:</b> Has never brought a vaccine to market since its founding, despite fielding 9+ vaccine candidates, none of which made it through phase 3 clinical trials.</p>
	<p><b>Johnson &amp; Johnson:</b> Named in hundreds of thousands of lawsuits for toxic and/or dangerous products, including drugs, shampoos, medical equipment, and asbestos-contaminated baby powder.</p>
	<p><b>AstraZeneca:</b> Suspended by two dozen European countries due to severe, lethal adverse reactions, like blood clots.</p>

Pfizer got FDA “approval” of their vaccine which is not scheduled to complete trials until 2023. Those trials included its affect on pregnant “people” (*to be woke*). Given their history of bribery, perhaps the bank accounts of FDA officials should be examined? Now the good news...with FDA “approval”, Pfizer is open to liability claims to add to the hundreds of thousands lawsuits already in play. The bad news...they will use the FDA “approval” to force mandates by companies. The good news...it was NOT an approval...simply an extension of the emergency use authorization. Janet Woodcock is the acting FDA commissioner, who approved the jab, also presided over one of the worst regulatory agency failures in U.S. history. "Examples (35 of them) of improper opioid decisions mentioned in the letter include "approving the opioid Opana without adequate evidence of safety or long-term efficacy, approving the opioid Zohydro despite a vote of 11-2 against approval by a scientific advisory committee, and approving promotion of OxyContin for children as young as 11 years old." and they also approved Fentanyl...one of the most dangerous drugs being trafficked by the cartels.

Simple rebuttal: I will prove I took the jab if the company will prove they have inoculated all employees for gonorrhea, rabies and a list of other diseases. They will tell you they can't do that because of HIPPA (*Health Information Patient Protection Act*) at which point you just smile and say “touché”!

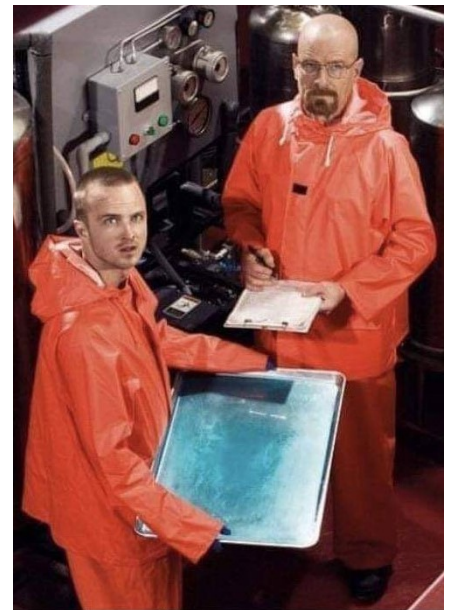

A more subtle approach would be to tell them you need a copy of their “mandate” signed by an officer of the company...for your lawyer. Bullies do not like any form of confrontation. For you older folks...“Sock It To ‘em”!

*(See book report): We Went from '15 Days to Slow the Spread' to 'Wear a Burqa and Get a Jab Every 6 Months in Perpetuity'.* Tucker Carlson's TV reports are saying what everyone is thinking. Wonder how long he will last? I cut the cable years ago but you can catch him on the internet at some of the (*actual*) news websites. I'm too pissed off about Afghanistan to comment. I have a grandson at the mercy of the idiot supposedly in charge. Hope he remembers to avoid the jab for religious reasons.

**Until next week...**
