

Recipe Corner

Garden is doing well. That's a lone artichoke plant in with chives, garlic, two kinds of tomatoes and several rows of popcorn. May have won the battle with Japanese beetles.

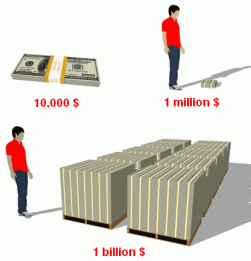

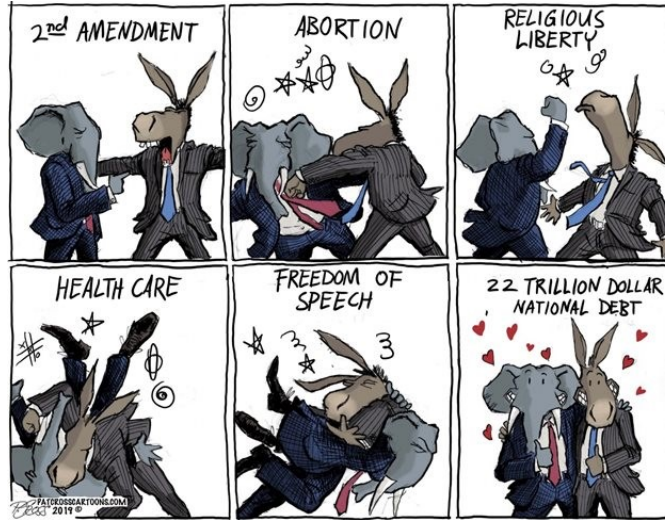

Last year's war was immortalized with Brenda's framing of an art deco leaf showing the kind of damage they do. Used a quart of Sevin (\$14) and a \$10 HDX gallon sprayer for two 4oz applications.

THE FRANK REPORT

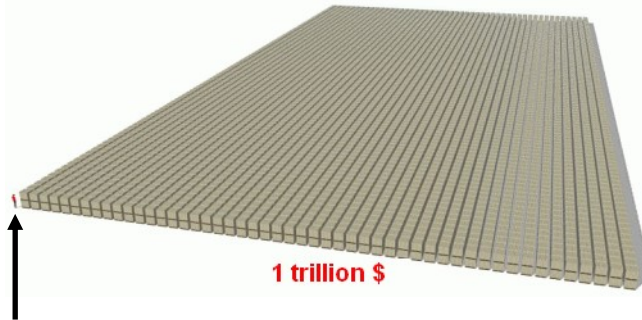

8.3.2019 #185

All the news I see fit to print.
Freedom of the press belongs to those who own one.

Politicians love our money. At left shows \$100 bills up to one billion dollars.

Below is what a trillion would look like using the same scale.

Easy to lose sight of that guy with numbers this large. He's the taxpayer who has to come up with the money. Now...imagine that stack 22 times larger...scary ain't it? Not as scary as the Democrat freebie tournament that would cost **\$200 trillion more!**

SO OBAMA IMPORTS 70,000 SOMALI IMMIGRANTS AND PARKS THEM IN MINNESOTA, WHERE ALMOST ALL CLUSTER IN A SINGLE AREA, SPECIFICALLY THE FIFTH CONGRESSIONAL DISTRICT.

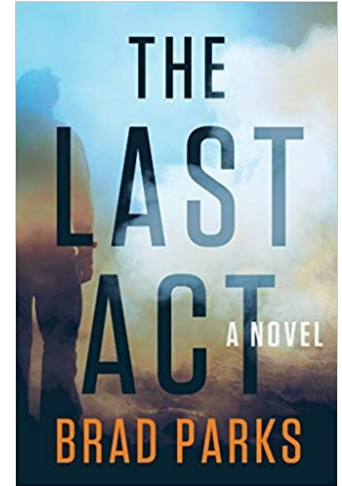

The Democrats ask "So what?"...

THAT DISTRICT RECENTLY WAS IDENTIFIED BY THE FBI AS AMERICA'S TERRORIST RECRUITMENT CAPITAL, AND IS REPRESENTED BY ILHAN OMAR, WHO IS CALLING FOR DISSOLUTION OF AMERICA'S HOMELAND SECURITY. ARE YOU CONNECTING THE DOTS YET?

Bon Mots

You people complaining about my attitude?

That's actually my personality.

Book Report

Brad Parks is always a good read. Unusual plot with FBI and white collar crime tied to drug cartel. Undercover actor in prison digging info. Ending is really good...did not even guess at it!

If you're using ROKU for streaming, they have their own list of movies albeit with commercials. However, only total of ten minutes within *The Fugitive* movie starting Harrison Ford and Tommy Lee Jones. Forgot how good this movie is. One time cost of \$60 and I've been using ROKU for years.

-more-

Working on landscaping lighting. Figured a way to add LED spotlights for flag. Had to work backwards since access to the wiring meant taking the existing light apart and figure out how to wire the new spotlight. Navy flag there too so thanks to their electronics classes that I could figure it out. Five led lights in a soft white (3000K) for a total of 35 watts...less than what an indoor night light with standard bulb uses.

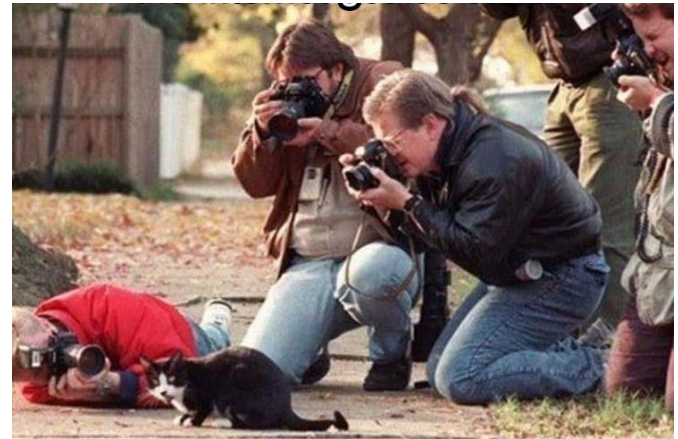

Step one is to clean all the bugs off. Then remove the existing light. Take all the clamps off and pull the wires out. There's usually a foot or more not required. The wire for the LED light is 22 braded gauge so best to solder it before using the connectors to get all the wires together so they can fit back into the box. I also wrap the 22 gauge wire with electricians tape for added support. Clean the old light and attach. Turn on the switch and if everything works (*and there's no smoke*), use clear silicone caulk to further protect from the weather.

Looking good...entry lighting update next.

President Trump has more than tolerated the White House "Corpse" (as Obama would say) who claim to represent the best interests of the American people.

The Clinton kid gets a cat and that same "corpse" was focused on "Socks" rather than what Bill was doing in the oval office with a cigar and an intern.

I hear that the *New York Times* is hiring even more photographers for the 2020 election. Yes...that's Stevie Wonder.
