Moscow Mule

Might as well help the Dumbocrats with the Russia collusion illusion and include this one. Favorite beverage of my grandson Mr. Z.

Ingredients:

- 2 ounces vodka
- 6 ounces ginger beer
- 1/4 ounce fresh lime juice
- Lime garnish

Directions:

- Place ice into copper mug and pour in vodka.
- Squeeze in lime juice and top with ginger beer.
- Garnish with lime wedge.

Governor Timmy here in MN ignored the law against wearing of masks. His BLM and Antifa buddies proceeded to destroy the MN budget as well as the entire downtown area. Statute 2019, section 609.735 forbids wearing of masks with the exception for medical **treatment**.

Timmy's illegal Executive order 20-81 mandates the mask for medical **prevention**.

Who Is This Guy?

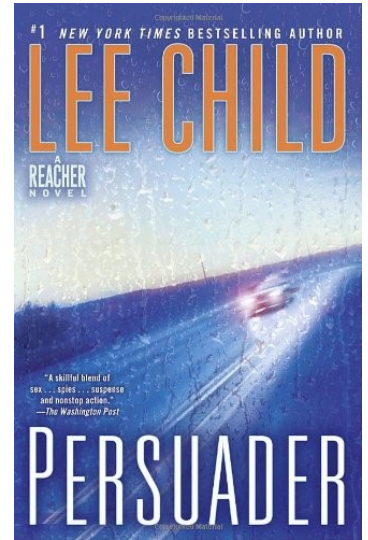

Floyd had spent five years behind bars in 2009 for an assault and robbery two years earlier, and before that, had been convicted of charges ranging from theft with a firearm to drugs. He had several children with multiple women. Four Minneapolis police officers tried to take him into custody after he was caught trying to pass a counterfeit bill...at a liquor store...after ingesting a lethal dose of fentanyl and methamphetamine. The four officers were fired and charged with murder without due process and the Lame Stream Media spotted another focal point for their agenda. Floyd was six foot seven and a former bouncer at a local bar which explains why it took four officers to subdue a man high on mind altering drugs. The "I Can't Breathe" mantra became as infamous as the "Hands Up Don't Shoot" lie perpetrated by the Lame Stream Media. Floyd was vertical and untouched when he began that chant...proven in the video the Lame Stream Media has totally ignored.

Trucker at the 595 truck stop in Ft Lauderdale, FL posted these pics. BLM and ANTIFA busses with armed guards. Heavily organized.

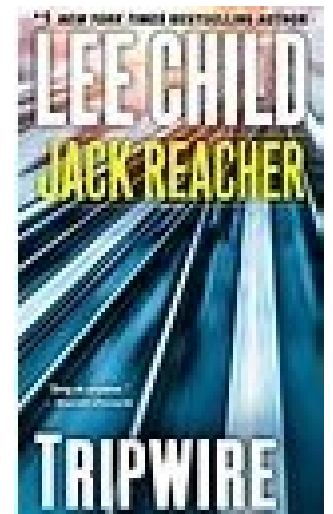

Floyd has now become the poster "saint" of BLM and Antifa with riots in 48 cities and billions of dollars in small business and property damage.

Book Report

Lee Child maintains persona of **Jack Reacher** even through very different plot scenarios. This is #7 in the 24 book series with #25 due in mid October. **Travis McGee** fans will recognize the character Lee has based his on...and freely admits it. He's a fan of J.D. MacDonald too. Unlike authors like James Patterson, Lee writes to entertain.

#3 in the series where he inherits a mansion. Fun and frantic thriller.

Understanding Computer Technology

An analogy closer to real life than it should be.

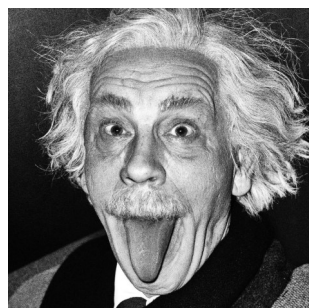

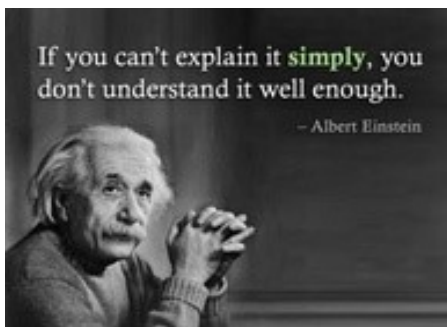

Advice for the school year:

My generation's mantra was never trust anyone over 30. Better is the admonition to never trust opinion as fact. Question everything, specially what is being offered as education today. Einstein is presented as the smartest man who ever lived. Einstein seemed to relish problem solving, and little else. He loathed the busy work of a typical school day and dropped out when he was 15. After Einstein left school in Munich, he tried to enter college in Zurich, but flunked the entrance exam. Think about that...whoever graded his exam penalized Einstein for not being able to regurgitate the answers they expected.

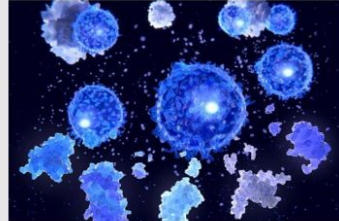

History teachers want you to memorize the dates of the Hundred Years War 1337 to 1453. Al would sit there and wonder "what the hell were they fighting about that took more than a hundred years and who won"?

Posit those questions and the history teacher would say "that's sociology and not part of my current syllabus." Al's response (below) would get an automatic grade of D?

Question of the Day

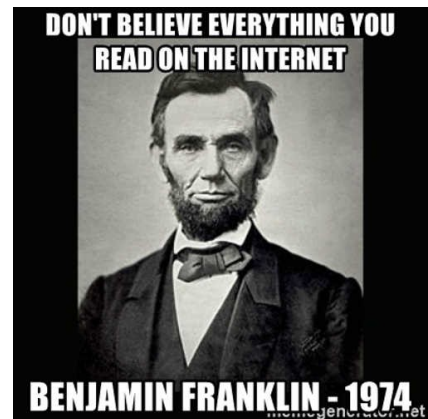

If science developed a vaccine that was 99.8% effective in killing Covid-19, would you favor a return to normalcy?

Abacadabra!

Your wish is granted! It's called the human immune system, and it is 99.8% effective in killing Covid-19.

Lame Stream Media...gotta love 'em!
