

The Frank Report

Recipe Corner

Kids went to Alaska and brought back a present for me. It's called an Ulu (pronounced oo-loo) and was invented by Eskimos. First time I used it I knew it was going to become my "go to" knife for slicing, cutting and chopping. The control is greater than with other knives. The blade is very thin but strong and beveled on just one side making it easy to keep clean and sharp. I have a foot long whet stone I use with all my knives and never start a kitchen project without first sharpening the blade. Maybe that's why I still have all my fingers. A dull knife is very dangerous.

Wilmer McLean owned a farm in Manassas, Virginia where the first battle of the US Civil War was fought. After the battle he left and bought a farm out in the country at Appomattox, Virginia...where Gen. Robert E. Lee surrendered to Gen. Ulysses Grant in McLeans home four years later.

9.2.2023 #398

*All the news I see fit to print.
Freedom of the press belongs to those who own one.*

The mainstream media is hyping an alleged surge in COVID-19 cases across America, which also coincides with vaccine makers such as Pfizer experiencing a rapid decline in profits.

Biden's Department of Health and Human Services has begun rolling out federal contracts for "COVID-19 response" set to begin on September 17th, 2023. The contract is for "program management office supporting initiatives that strengthen COVID-19 response and address emerging public health emergencies," according to a synopsis.

The contract is with Goldbelt Apex and is currently for \$1,816,071.23 but could potentially be raised to \$4,156,434.07 by its end date of March 16th, 2025. The company is active in the health information technology marketplace. Among its areas of focus are "coordination of response to public health emergencies" and "surveillance." (23 cents?)

The Alaska Native parent company of Goldbelt Apex is Goldbelt Incorporated, a for-profit corporation headquartered in Juneau, Alaska while Goldbelt Apex is located in Herndon, VA which is part of the Washington, DC metropolitan area.

So...\$4 million taxpayer dollars to fund the new COVID emergency throughout the next election cycle with funds dispersed by a company conveniently located within minutes of the CIA's Operation Mockingbird. Obama made it legal for the CIA to propagandize Americans."

The Lame Stream Media follows the scripts from Goldbelt Apex while Big Pharma continues to supply 75% of the LSM's ad revenue that is well beyond the pittance of \$4 million.

With the COVID hysteria again established, mail-in ballots and other election fraud shortcuts will follow and we will have a repeat of the process that gave us Joe Biden.

Maybe Sarah Palin can find out what's going on in Juneau Alaska with that parent company?

August 1968, more than 53 million Americans watched the nightly news on ABC, CBS and NBC. At that time there were a little over 200 million Americans. August 2016, all major networks and cable news shows combined had 28 million viewers. Tucker's interview of Trump had 260 million viewers.

Movie Report

Free on Amazon Prime, this Japanese movie set in pre WW2 is a fascinating glimpse at the other side of their society during this time. It's English dubbed by Japanese actors who overdue the slang and several of the cast overdue the "acting". Overlook those flaws and be prepared for some thoughts about the Japanese culture you never would have noticed...and how it gave the movie a twist at the end you didn't expect. The battle scenes that open with the sinking of the Yamato are better than the disaster scenes from *Titanic*.

Another hidden Prime jewel focused on Polish pilots with the RAF. Great aerial battles and disturbing history of what happened after Stalin was given Poland by FDR.

I find it strange that opposing lawyers both get paid no matter who wins.

Would you pay a car mechanic who couldn't fix your brakes but did make your horn louder?

Why do restaurants call them "waiters" when you're the one waiting for a table and then for your food?

The bride buys a dress that costs thousands of dollars. The groom rents a tux for about 50 bucks. Hmmm.

Never piss off your wife. She can remember things that didn't even happen.

How come banks will loan you money only if you don't need it?

New parents are people who want to go to bed but first have to put little people to bed who don't really want to go to bed.

I've recently noticed that my body is making the same noise as my coffee machine.

Also noticed that the older I get...less peer pressure?

You don't stop laughing as you get old. You get old when you stop laughing.

Big Pharma has been so successful that there's hardly a healthy human left.

I was educated by Jesuits. Took me years to get over it.

I also duck and cover every time I see a nun, specially ones w/metal edged rulers.

After a change Democrats made to Minnesota law, the Moorhead Police Department is pulling its school resource officers out of Moorhead Public Schools. Changes in the law have been interpreted by their legal counsel that it removes the standard law enforcement authority of officers contracted by school districts or assigned to work in schools. A section of Minnesota's education bill signed into law by Gov. Tim Walz in May limits the holds school resource officers can use on students. Under the law, school resource officers cannot use a face down restraint.

Maybe kick the "student" in the butt to get their brain back where it belongs?

Top law enforcement agencies and associations continue to meet in an effort to find a solution that allows school resource officers the flexibility to do their jobs. Unless a resolution is reached soon, Moorhead may just be the first of several Minnesota police departments to pull officers out of schools due to Democrat controlled legislative overreach.

Maybe they should consult with the Chicago LEOs:

The Chicago Police Department recorded an increase in car thefts from 9,000 to 21,000 in just the past three years. Chicago Mayor Brandon Johnson (D) announced on Thursday the city is suing automakers Kia and Hyundai for "their failure to include industry-standard engine immobilizers in multiple models of their vehicles," which according to the city, is the reason for the high rate of crimes involving cars. *To combat the car thefts, the city has released a step by step diagram of how the thefts can be accomplished and offer a free coat hanger to open the doors without breaking the windows. (sarc off).*

Hennepin County Attorney Mary Moriarty charged and sentenced a police officer chasing a car thief. Charges were dismissed against the driver of the stolen vehicle.

In February 2021 Georgia District Attorney Fani Willis opened an investigation into President Trump's call to Georgia Secretary of State Brad Raffensperger following the 2020 election. The call by Trump to Raffensperger asked him to look at some of the items that were uncovered by his auditor. There was evidence that the election was uncertifiable.

Jordan Fuchs, an aide to Raffensperger, secretly recorded the phone call with President Trump then lied about the contents of the call. She leaked the bogus call to the Lame Stream Media but she was caught lying when the original recording of the call was found deleted on her computer. Fani Willis indicted Trump using the fake call as primary evidence against Trump.

The evidence from the Trump audit is still ignored...until the arrest of Trump that will now allow his legal team to present the evidence of election fraud.

BTW: Fani Willis' election campaign director, Jeremy Halbert Harris, worked for the Biden campaign in Georgia during the 2020 election cycle.

The Deep State and RINO Republicans are doing everything they can to stop Trump. Their tactics have become desperate and transparent. Supreme Court will sort this out soon.

Until next week...
