Brown Sugar Oats Cookies Ingredients

- 1 cup Salted Butter, Softened
- 2 cups Packed Brown Sugar
- 2 teaspoons Vanilla Extract
- 2 whole Eggs
- 1-1/2 cup All-purpose Flour
- 1 teaspoon Salt
- 1/2 teaspoon Baking Soda
- 3 cups Old Fashioned Oats

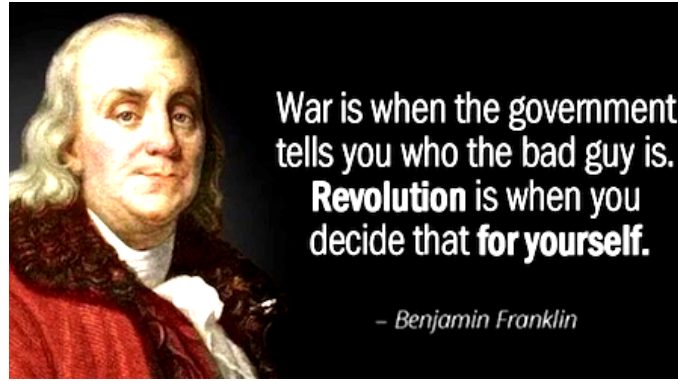

Instructions

Preheat the oven to 350 F.
In the bowl of an electric mixer (or using a hand mixer) beat together the butter and brown sugar until fluffy. Beat in vanilla. Add eggs, one at a time, scraping the bowl after each one.

Mix together the flour, salt, and baking soda in a medium sized bowl. Add it into the creamed mixture in 2 to 3 batches, mixing it until just combined. Mix in the oats until just combined. Use a regular spoon to drop portions of dough onto a lightly greased cookie sheet, (I use parchment paper) spacing them a couple inches apart. Bake for 12-13 minutes or until dark and chewy. Crispier cookie? Just cook a minute longer! Let them cool on the pan after removing from oven. Don't know if you can freeze them because they never last long enough.

Tip: notice how lettuce wilts and rots so quickly? Cookies don't do that.

The Frank Report

9.23.2023 #401

All the news I see fit to print.

Freedom of the press belongs to those who own one.

Our government, or the unelected billionaire globalists behind the curtain, are telling us the bad guys are Russia and China. I do not consider them enemies. I consider them countries acting in a way that benefits them. The U.S. is the global bully, intimidating and bribing countries to do their bidding.

Ukraine, the most corrupt country in the world, and the playground of the Biden Crime Family, has been utilized by Biden and his neo-con handlers, to try and bleed Russia so they can beat them in their next war. Instead, they have used the young men of Ukraine as cannon fodder, leaving that country with no future. That's what the U.S. global empire does. It destroys.

The founding fathers had it correct...distribute the powers of government across the states. Great idea based on a horrible situation...slavery. State's rights remain key reason for the shifting of the population away from idiots running California and Minnesota (and others.) Jefferson and Hamilton started this battle. It would appear it's still raging. Those who don't read history will remain misinformed (*and stupid*) voters. It's an environment our federal controlled educational system encourages including eliminating all those civics classes the older generation attended. Department of Education at the federal level...and with the teacher's union thrown in...is a disaster for our Republic. We have so many federal bureaucracies they are banning gas stoves and lawn mowers.

Housekeeping note: I've switched the blog website (www.franksiegler.com) to a new host as well as the email address. (fns@franksiegler.com). I bought a backup computer and am in the process of loading software to improve the blog. My impression of what's happening as I follow instructions on downloading and using the new computer/software: "lift your left leg, pat your head, rub your nose and shout out your password as we capture your credit card number and the routing number to your banking account".

Books, TV & more

Some of you are old enough to remember Rowan and Martin's *Laugh In* TV series that ran 1967—1973 that included Pat Paulsen's very sarcastic run for President. Here's one of his better campaign quips:

"The Bill of Rights says nothing about freedom of seeing. You can look for it, but if you see it, you better not show it to anybody."

Pray fervently that this kind of honest humor, untethered from woke and corporate control, can return to the television networks control by the FCC. With six corporations owning most of TV, radio, newspaper and publishing firms, it's no wonder we have lost the art of political satire of both political parties.

Please make the stupid people shut up!

Time for a parable:

My computer died so I hauled out my old trusty Smith Corona manual typewriter to capture some rare moments of clarity. After a few hours, the doorbell rang and two gentlemen identified themselves as representatives from the Smith Corona company. They said they had upgrades for my typewriter that evidently had not been made.

So we went to my office where one of them tore off the carriage return and replaced it with another.

"What's the difference," I asked.

He said the carriage would now be pulled from the left to the right instead of the vice of the versus.

"What the hell does that accomplish," I asked.

He said it was in keeping with the company's new policy supporting equity with left handed people and it was mandatory.

"But I'm right handed," I whined.

"Doesn't matter," he said. "The right to left carriage has now been deprecated and we will no longer support it".

"Deprecated is an IT term geeks use to confuse non-geeks so they can sell non-geeks new software. What does that have to do with Smith Corona"?

He smiled and said "Bill Gates bought the company yesterday."

Thus the word deprecated has now been added to my vocabulary. I have officially deprecated the RINO party and will no longer recognize nor support it. Any politician who asks for my vote, and uses the R with their name as their primary qualification, will also be deprecated.
