

### Recipe Corner

#### **Skip and Go Naked**

*This week's political tonic comes via **Fort Derussy Officer's Club**. They would serve you one and the second was free if you could stand up after the first one. Here's a vague recollection of the ingredients:*

Use a tall beer mug, 22oz or something bigger. Pour the shots in first, add beer then grenadine, then top off with lemonade, stir if you want. The shots are a 180 proof dark rum, then 90 proof vodka, a bit of bourbon and then lots of fruit on sticks. And a tiny umbrella, of course.

**Fort Derussy was R&R between Vietnam combat missions:** Jack Paulus was a five foot nothing 100 pound soaking wet pilot who would always get the second one. Chuck Akins was a strict teetotaler who would help himself to the fruit (*not realizing the alcohol infused morsels were very lethal*). The flight surgeon was in on the joke and would prescribe aspirin. Fun memories.

### *The Frank Report*

9.5.2020 #242

*All the news I see fit to print.*

*Freedom of the press belongs to those who own one.*

Roselee and the kids often smiled at what they call my "windmills". I spent five years as a SCORE counselor (*designated as such by the Small Business Administration*) and provided seminars on the subject of customer service. When I find obnoxious examples of bad customer service, it's a knee jerk reflex thing for me to respond. Even if I don't win, it gives me some satisfaction that they had to acknowledge the problem. Like repairing computers: *take your left shoe off and smack the computer on the right side. It won't fix it, but you'll feel better!*

\*Admonitions should be done with humor. I have received some very nice responses from top corporate people when I shine a light on where they are failing. Most of the problems come from a reliance on their websites to satisfy customer complaints. I always ask if they have tried the website themselves to see if it's working the way they want it to. Their response is always positive thanking me for pointing out the broken links and deficiencies. *\*Always use snail mail. Today's technology makes a letter an oddity that will usually be passed from the mail room right to the top office to handle.*

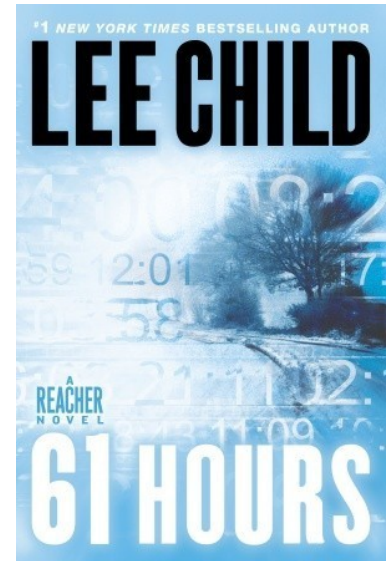

There is a corollary...when you find good customer service, be sure to let them know. When I encounter absolutely great customer service face to face, I make sure to get their names and write a letter to the top. Had one case where I walked into one of my favorite stores and a lady came up and asked me if she could hug me. Evidently the subject of one of those "attaboy" letters.

That put a smile on my face for the whole day.

**Try it...you'll like it!**

**Bon Mots**  
Lame Stream Media  
begins with  
'Good evening,'  
then proceeds  
to tell you why it isn't.

### Book Report

Wondered how many **Jack Reacher** books I had read. Marathon coming up as there are TEN I haven't read. This one is the grittiest getting way deep into the Dark Web.

Someone's killing women **Jack Reacher** has known. FBI puts a tight leash on him to find the killer. Twisted plot ending.

**-more-**

Former First Lady Michelle Obama claims that white people either don't acknowledge that black people exist or they see them as a threat.

**Quick test:**

Make a list of ten people you admire.

Now write color of their skin next to their name.

Had to think about it, didn't you?

And yeah, Moochelle wasn't on my list either.

**For \$1,200 we will come to your house dressed as a Covid-19 rescue team and take you from your wife for a 14 day fishing trip and return you.**

*Surely there is an entrepreneur out there who will cash in on this? If there are no clients, they could use the suits to stage an "inspection" of every bar in town...*

*...and also sell these bar appropriate face masks.*

*"This is a hyped, panic-filled version. It's exactly how the media deals with these things to create audience, readership, interest, clicks, what have you. The survival rate of this is 98%! You have to read very deeply to find that number, that 2% of the people get the coronavirus die. That's less than the flu, folks. That is a far lower death statistic than any form of influenza, which is an annual thing that everybody gets shots for. There's nothing unusual about the coronavirus. In fact, coronavirus is not something new. There are all kinds of viruses that have that name".*

**Rush Limbaugh 2.24.2020**

**reported in The Frank Report 2.29.2020**

**(189 days ago!!!)**

**August 29, 2020 the CDC** quietly updated the Covid number to admit that **only 6% of the 153,504 deaths recorded actually died from Covid**

That's 9,210 deaths out of 153,504.

*(The CDC lowest estimate of death from normal flu season is 24,000 )*

The other 94% had 2-3 other serious illnesses:

**Influenza and pneumonia**

**Respiratory failure**

**Hypertensive disease**

**Diabetes**

**Vascular and unspecified dementia**

**Cardiac arrest**

**Heart failure**

**Renal failure**

**Intentional and unintentional injury**

**poisoning and other adverse events**

**Jeffrey Epstein?**

**Hillary's 36 friends "suicides"?**

Of note is the fact that hospitals make more money from Covid deaths than any of these other deaths.

The Lame Stream Media is now focused on "cases" using testing as their barometer. Group of nurses in New Jersey sent in swabs right out of the package and they all came back marked positive. The CDC admits at least 20% false positives being recorded. Meanwhile, divorce lawyers and bootleg barbers are prospering. The army of Karen's who point at my bare face are shocked when I tell them I'm not wearing underwear either and I feel safe shaking hands again now that the toilet paper shortage is over.
