

The "Boom Belt" is basically America's new economic engin, 11 states: (*Alabama Arkansas Florida Georgia Louisiana Mississippi North Carolina Oklahoma South Carolina Tennessee Texas*). Together, these states have the 3rd largest GDP in the world. They're responsible for around 70% of U.S. population growth and 57% of all new jobs. The Old South was misgoverned by Democrats for 150 years and within two decades of Republican governance, it is now the economic engine of America. New England used to be Republican and prospered, but now it is becoming an economic backwater. California was the land of milk and honey when Ronald Reagan governed and now it is a train wreck of public unions and Democrat government.

Speaking of the South: Arkansas Gov Sarah Sanders Announced Big Gains in Test Scores After Banning Critical Race Theory and Gender Nonsense to Focus on the Basic R's. *Surprise!*

Rank states by job growth: Republican-led states at the top: Idaho, Utah, Texas, Florida, Wyoming, the Carolinas. The bottom of the list? Almost entirely blue: New York, Massachusetts, Pennsylvania, DC. It's by policy not accident. Red states bet on growth, freedom, and business. Blue states bet on taxes, regulation, and government.

All the news I see fit to print.

Freedom of the press belongs to those who own one.

The Deep State has done everything they can to throttle the bulldozer President Trump has brought to bear to Make American Great Again. The primary weapon they have used, besides RINO's in Congress, has been the judicial system. I didn't know just how bad it was until I did some research. The key barometer is how many preliminary injunctions have been brought against a sitting president's administrative policies:

Four years of Jimmy Carter had two.
Eight years of Ronald Reagan had 12.
Four years of George H. W. Bush had six.
Eight years of Bill Clinton had 12.
Eight years of George W. Bush had six.
Eight years of Obama had 12.
Four years of Biden had 21.

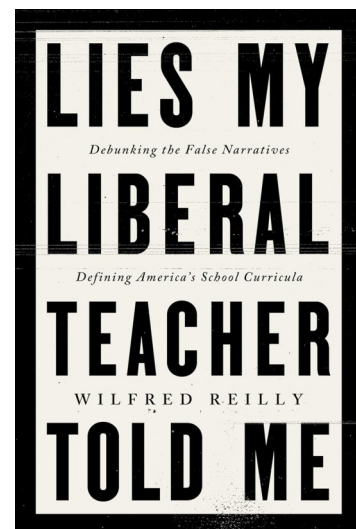

Five years of Donald Trump has had 244 and counting...

Here are a few of the 244 to give you some idea of what he has been up against: A foreign-born Indian judge named "Sparkle" blocked Trump admin from using an immigration database to check voter rolls for fraud...Judge Boassholeberg (sic) ordered Trump to turn airplanes around mid flight that were deporting illegal alien criminals...A federal judge blocked ICE's policy of arresting illegal aliens at courthouses...another was arrested and is going to jail for hiding Illegal aliens at her courthouse...A federal judge blocked the Trump administration from using a federal database to check the citizenship status of illegal aliens and remove them from voter rolls... multiple Justice Department subpoenas to Minnesota Gov. Tim Walz and other officials tied to a federal investigation were blocked...Biden-appointed judge ordered security fence removed at Eugene Federal Building so Antifa and anarchist rioters got their favorite attack staging ground back...I could fill a few more pages but rest assured, these idiots are being slapped down by higher courts yet they are not reprimanded nor impeached. The reversals take time which is exactly their plan...to outlast President Trump.

Meanwhile: how has the Lame Stream Media covered this idiocy?

"OMG! Did you see the algae in the reflecting pool?"

Other stories NONE but Fox covered: *Illegal aliens tried to blow up the White House UFC event...muslin gang raped 250k+ British girls...proof that Fauci funded gain of function research with tax dollars at Wuhan...can we hate them more?*

Book Report

You can find this one at Amazon by searching with the author's name;

Wilfred Reilly.

Lie #2 was very interesting as I remember the "Red Scare" in the early 1950's (yeah, I'm old) and the Deep State destruction of Joseph McCarthy. The Verona Files, uncovered after the fall of the Soviet Union, proved Joe to be absolutely correct.

BTW: remember when the Clintons wrote books?

Bill Clinton Received About \$15 Million for his Memoir my Life.

Hillary Clinton Received About \$8 Million for her Memoir Living History.

That's About \$23 Million Dollars for the Memories of Two People Who Testify They Can't Remember Anything.

I'll wait the few weeks before their books are 50 cents in the bin at Walmart but wonder if they include their political resumes:

- 12 rape accusations,
- 121 mysterious deaths (57 from their inner circle),
- 1 dead American ambassador,
- 3 Navy Seals Dead,
- 10 investigations, 1 impeachment,
- 2 disbarments,
- 30,000+ emails deleted to hinder a federal investigation and helped arm and create ISIS by political decisions made as Secretary of State.

Tulsi Gabbard's final day as DNI: "According to hundreds of reviewed emails,, Fauci engaged in fraud and a cover-up of his actions with the intelligence community (IC), directly contradicting sworn testimony before Congress, denying that he ever discussed COVID-19 with the IC". "Before the COVID pandemic, Dr. Fauci, as head of the National Institute of Allergy and Infectious Diseases, provided millions in US taxpayer dollars to fund dangerous gain-of-function research on bat coronaviruses at the Wuhan Institute of Virology, work which is now widely viewed as the source of the unintentional lab leak that sparked the pandemic," "Today on my final day as Director of National Intelligence, I'm releasing never-before-seen communications and documents that expose exactly how Fauci worked with politicized career leadership in the intelligence community to suppress the truth about his actions, the virus's lab leak origins, and his role in directing US funding for this dangerous research that caused immeasurable harm and countless lost lives."

Tulsi resigned to take care of her husband who was diagnosed with a rare form of cancer.

Sharyl Attkisson is an investigative reporter who added a whopper to Tulsi Gabbard's damning Lists of Fauci Receipts: "As he was going on comedy shows and testifying to Congress early on that Covid was "ten times deadlier than flu," he actually co-published a scientific paper stating the opposite: saying Covid was about like a bad flu season. At the time, I called his office and although he was never shy, he wouldn't agree to an interview with me.

I then asked his office to explain which of his statements was correct. One or the other had to be false, by definition. Fauci's office declined to answer.

BTW: Christine Grady is the head of NIH Bio Ethics. She approves the drugs for the FDA. Her husband is Anthony Fauci.

Meanwhile, tick-borne meat allergies shot up 10,000% as Bill Gates spent \$7.6 MILLION creating GMO ticks designed to SPREAD in the wild. When is the FBI going to investigate Gates and all potential bioterror activities behind the MAJOR surge in alpha-gal syndrome, which now affects an estimated 450,000 Americans making them allergic to meat. Maybe this is what happened to bread causing sickness due to gluten intolerance?
