

Pfizer, one of the companies that made COVID-19 shots forced on Americans during the China virus pandemic that killed millions around the globe, is being sued.

The announcement comes from James Uthmeier, the attorney general for the state of Florida.

*"Weeks ago we learned Joe Biden COVID adviser **Fauci** and the biomedical state knew the COVID jabs were dangerous but hid it from us.*

While that investigation continues, today we sued Pfizer for deceptively marketing the products as safe—making billions—while pregnant women were miscarrying their babies and teenagers were having heart attacks." Pfizer misled consumers about the product's safety and effectiveness even as it was collecting revenue of \$80 billion. That might cover most of the lawsuits?

Related disturbing news:

"The Trump administration is demanding answers from a New York hospital over a viral claim that a stunning 80 of 82 residency positions went to foreign doctors on H-1B or J-1 visas, leaving just two positions for Americans."

Nearly 1 in 3 Internal Medicine Residency Spots In US Filled in 2026 Went to Doctors Who Aren't Citizens.

Let's hope they at least speak English.

The Frank Report

10.10.2026 #563

All the news I see fit to print.

Freedom of the press belongs to those who own one.

It took Obama over three years to build and launch **Healthcare.gov**. It cost taxpayers \$2 billion and was riddled with bugs, making it unusable for months after launch.

It took Trump 13 months to build and launch **America.gov**. Cost taxpayers a couple million dollars and works seamlessly on day one...29,000 gov agencies on one website.

The website will expand and integrate across government services in the near future.

Beginning in 2027, the plan gets much bigger, with Americans being able to fill out forms, track applications, and complete government tasks without elbowing their way through a massive and horrific maze of different agencies.

"Our goal is that anything you might need from the United States government will be accessible at your fingertips and very quickly at your command," Trump said.

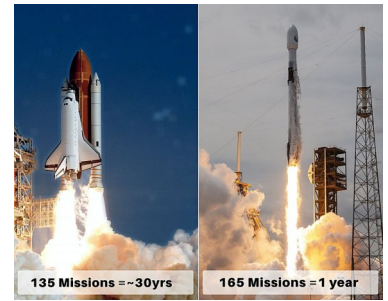

If government paperwork, records, and identity-related services can be made simple, the next fight over voter ID and proof of citizenship is eliminated.

Now let's do all the state governments!

BUT let's keep CA illegals off that website: CA's 'Shadow Welfare System' Offers Illegal Alien Families Up to \$100K a Year. It includes "health care, rental assistance, college grants, tax credits, low-cost car insurance, and even smartphones." They've estimated the cost to California taxpayers to be nearly \$11 billion. *Rookie numbers when compared to Somalians in Minnesota?*

The Biden administration paid brokers for every person they signed up for Obamacare. At the same time, they relaxed the eligibility rules and loosened the checks that were supposed to catch fake enrollees. When you pay people per sign-up and stop checking who's signing up, you shouldn't be shocked when fraud explodes.

Treasury blocked \$175 million in federal payments tied to deceased recipients during fiscal year 2026. More than 99% of federal programs now have access to the Do Not Pay tool, up from roughly 4% after FY2025.

NASA took 30 years to launch 135 space missions.

Elon Musk did 165 in one year.

From 1996 to 2025, NASA spent \$555 billion...the appropriations provided by the U.S. Congress for the agency over 30-years for 135 missions..

Elon spent \$3 billion during 2025 for 165 SpaceX missions.

NASA lobbyists do not like Elon.

Maybe THIS is why LSM not covering Trump Rallies:

President Trump's motorcade tore through the rainy highways between Texas and Oklahoma after bad weather grounded his air travel, with a press van hitting 98 mph while trying to keep up with "The Beast." *Missed opportunity...should have arrested the press van for speeding?*

Another reason Muslims don't like dogs:

California Police Dog Sniffs Out 440 Pounds of Cocaine Stuffed Inside SUV. Gov Newscum to ban that dog from his house?

D.O.G.E. says:

USAID gave Chelsea Clinton a grant of \$82million through the Clinton Global Initiative. \$3million spent on her wedding and \$11million on a mansion. *Not a dime of income tax was paid on this money.*

I'll Stick To Sam's Club

18-year-old Sheikhdoon Abdul-lahi Mohamud, faces a federal terrorism charge that he planned an Oct 24 mass shooting at the Mall of America.

History books are the greatest argument against communism.

Ladies: if a frog asks you to kiss it to find a handsome prince, a talking frog is more valuable.

Note: Voting Republican is easier than moving after Democrats destroy your state.

After the midterm election, either we're getting \$5k or illegal immigrants will.

When are things going to spiral into not out of control?

Democrats are pushing for a 32 hour work week while most of them don't have jobs.

Reminder: the polls gave Hillary a 70-90% chance of winning the 2016 election.

All that stuff that taste like chicken: why not eggs?

The end of AI will come when it tells a woman she's wrong and to calm down.

The economy grew at a faster pace than previously estimated in the first half of 2025, data from the Commerce Department reported.

Gross domestic product rose at a 2.2 percent annualized rate in the April through June period, the government said. The previous estimate had been for 1.5 percent growth. The personal consumption expenditures price index climbed 3.4 percent over the past 12 months through August. Economists had forecast a 3.7 percent increase. Which really means inflation is going down not up.

The Census Bureau's latest data show real median household income reached its highest level in history in 2025 [this partially reflects the middle-class income increase]. The Atlanta Fed's GDPNow model is estimating 5.1% annualized GDP growth for the third quarter. The official poverty rate has fallen to 10.2%, the lowest level on record.

The US economy has now experienced 78 consecutive months of expansion, the 6th-longest business cycle since 1854.

If you're still wondering about the price of gas and diesel: let's take a look at Joe Biden's **first day in office:** killed keystone...froze ANWR oil and gas leasing...halted new federal drilling permits...stopped the border wall...opened the border to millions of illegals. *Whatta guy! Now think what the Democrats will do if they win the midterms.*

BTW: Have you noticed that there were eight elections in Latin America since USAID got defunded and the "far-right" won all eight of them.

That Cornell University gang rape scandal, that happened while Biden was president, has nothing to do with President Trump, nothing to do with Republicans, nothing to do with America, nothing to do with our culture, nothing to do with men, nothing to do with me, nothing to do with you, and everything to do with yet another failure of an institution run exclusively by leftists and Democrats.

Home-educated students do notably better on standardized academic tests on average than those in institutional schools. In the last 50 years, home-schooling has gone from being perceived as a fringe experiment to a form of education serving around six percent of American school-age children; that is about 3.4 million K-12 homeschool students. Home-educated students continue to perform well, scoring 25 to 29 percentile points above national average. Given the teachers unions that use the dues to support Democrats, we have evolved into a monopoly, and like every monopoly, we get very low product at a very high cost. It's time for homeschoolers to get the money they would have paid for the monopoly.

Tidbits

(a small and particularly interesting item of gossip or information)

CA Gov. Gavin Newsom (D of course) signed ten new gun control bills, one of which is designed to block 3D printers from printing firearms. Now ranked #1 in gun law strictness with over 100 while IL and NY have 42. Rookie numbers!

If that was bad, this one is ridiculous: California Passed New Law Requiring Booster Seats For Children Up To Age 16.

California provides a taxpayer funded cash assistance program "that is for MIGRANTS ONLY". They receive \$14,000 CASH PER YEAR EACH.

California wants to ban BB guns. *Ralphie from The Christmas Story will have to surrender his?*

Newsom made checking ID when voting ILLEGAL in every city in the entire state of California.

"This is so much fun!"

He signed AB 2222, effectively a cash subsidy paid to news organizations. The cost will be roughly \$55 million a year. Gavin Newsom is effectively forcing taxpayers to fund failing media organizations.

San Francisco: 25% of convicted rapists, pedophiles and sex offenders live in TAXPAYER-FUNDED HOUSING.

Since 2019, Newsom has signed more than 80 gun-related measures, new taxes, mandates, and restrictions of the 2nd Amendment.

Until next week...
