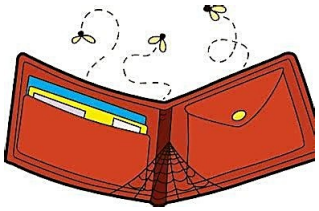
The Frank Report

10.24.2026 *#565*

All the news I see fit to print.

Freedom of the press belongs to those who own one.



What's in your wallet?
Better hide what's left.

Major U.S. banks denied financial services to conservative businesses, Trump merchandise sellers and Christian organizations, with employees citing customers' political views, religious beliefs and conflicts with the banks' own values, the Office of the Comptroller of the Currency reported. JPMorgan Chase, PNC, Wells Fargo, and Capital One were named as primary offenders while Citibank and Bank of America were also cited for lesser actions. BTW: Treasury Department report says the Southern Poverty Law Center was a driving force behind the debanking before the SPLC group's indictment.

The Treasury Department has created an online tip line that incentivize Americans to bring allegations of fraud directly to the administration in an effort to increase transparency and crack down on abuse of taxpayer dollars. The website encourages people to "blow the whistle on fraud, money laundering and sanctions/ tax violations."

And those who report explicit details of legitimate fraudulent transactions could see a pay day for their information….1% or more.

Independent journalist Nick Shirley got the first award of $10,000 for his reporting on MN Learing Centers fraud.

Cocaine in the White House	12	0
DOGE Findings	33	0
Hunter Laptop	9	0
2020 Election	10	0
Biden Family Corruption	39	0
TOTAL	531	0

Before you get too excited about the DHS/FBI raid on Ilhan Omar, consider this scorecard. Fingers crossed.

An audit of 58 foreign-born federal judges might be a hint of why justice is so slow. The worst of them all is Federal Judge Jon Tigar of the Northern District of California. Tigar issued anti-border rulings at 94 percent while ruling at 65 percent below crime guidelines. Tigar was born in London, England.

The next four of the worst of the worst include:

Sparkle Sooknanan, born in Trinidad, appointed by Biden: 94% anti-border, 62% pro-crime...***Araceli Martinez-Olguin***, born in Mexico, appointed by Biden: 93% anti-border, 63% pro-crime...***Myong Jin Joun***, born in South Korea, appointed by Biden: 90% anti-border, 67% pro-crime...***Tana Lin***, born in Taiwan, appointed by Biden: 91% anti-border, and 64% pro-crime. The most pro-America judges are all Donald Trump appointees.

The Social Security Administration (SSA) today announced substantial progress in its ongoing effort to strengthen the accuracy and integrity of the Social Security Number (SSN) database. This work represents the most comprehensive SSN record clean□up in the agency's 91-year history.

"The Social Security Number database is our country's books and records and accuracy is essential to maintaining integrity of government services. Accurate SSN records prevent fraud across federal programs and support the proper administration of benefits," said Commissioner Frank J. Bisignano.

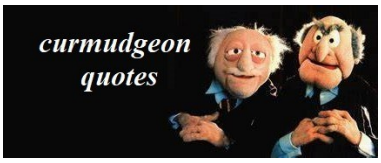
Check out this airhead!

If this is any indication of what Democrats have in store ***IF*** they win, they are gearing up to use lawfare to investigate anyone who ever worked for Trump. **Sen. Elissa Slutkin (D-MI) actually said it:**

"I want young people coming out of school to say, 'Should I go work for the Trump administration? Like that sounds fun. I might get an opportunity.'" She kept going. *"I want them to be like, 'Lord, that might be buying myself a ton of problems that I don't want, and so let me avoid participating in that,'"* she said. ***"I want that deterrence message sent."***

Message received. Let's hope Michigan voters respond to your threats directly aimed at their children. Sorry about that typo in your name.

Chaplain Michal Rivera Jr. Candidate for Farmington School Board. I know Michael. Trust me when I say he is more than qualified. Please vote for him. He's needed right now!



Have you noticed that being an adult is sometimes out of our price range?

Being an adult is expensive. And I had more fun being a kid.

To avoid stress at work: don't go.

I accept myself exactly as I am right now...confused and tired.

Hidden magic of clocks: reveals the cross over time between drinking coffee or alcohol.

At what point did our weekends become time for recovery rather than fun?

Kids become adults when they realize they can't skip work like they did classes.

My patience can usually be found at the bottom of a very large coffee cup…

...and I usually need a second cup to find out why the first one is not working.

Can I use the carpool lane if the other person is in the trunk? *Asking for a friend.*

Why do people hate lazy people? They didn't do anything.

So many people have inspired me to be nothing like them.

I always try to remember one thing in life. If I remember any more, I get confused.

Always work alone. If you work with a team, you have to deal with idiots. Working alone means you only deal with one.

A thief will steal your money and run away. A politician will steal it and bore you with the reasons why he stole it.

Politicians call it trillions of dollars in debt. I call it trillions of dollars in fraud.

Federal revenue rose by 3 percent, to more than $5.4 trillion, over the fiscal year. But spending rose by 6 percent, reaching $7.4 trillion while interest on the debt rose by 11 percent, exceeding $1.1 trillion.

Interest is now more than the amount shown above which is $100 bills stacked on pallets next to a semi truck and if you look closely, there's a taxpayer off the left front bumper weeping and gnashing his teeth.

Republicans dominate the executive and legislative branches of all five of the financially healthiest state governments, while, at the opposite end, Democrats exercise total control of the five states with the biggest debts, reported by TIA, a nonprofit watchdog.

Trump's strategy is to drive the economy so well that it eliminates the debt through sheer income. However, he hasn't been able to stay ahead of the politicians who continue to wallow in the pork barrel so they can brag about how much money they brought home to their voters...whether their voters wanted it or not.

Government gets involved in student loans
and the cost of a college education skyrockets.

Government gets involved in mortgage financing
and the cost of homes skyrockets.

Government gets involved in health insurance*
and the cost of health care skyrockets.

**U.S. national health spending reached $5.3 trillion in 2024, or $15,474 per person, according to CMS data. That spending was equal to 18.0 percent of GDP. The federal government paid for 31 percent of total health spending, and state and local governments paid for 16 percent. Combined, government paid $2.5 trillion.*

See a pattern here?

Our Founding Fathers created the Constitution and Bill of Rights to protect citizens *from* government. Now government passes laws to protect politicians from citizens!

Looks like we've got a few potholes to fill. How about this one: President can only have two terms. Sounds like a plan for the rest of the congress critters. It'd be nice if they were born here too.

The problems with the Senate could be fixed easily by repealing the 17th amendment and remove them from the campaign trail where they spend their time raising money for their reelection rather than time for us.

Tidbits

(a small and particularly interesting item of gossip or information)

Catholic Charities and Lutheran Social Services exploited high-dollar government contracts and were instrumental in turning Minnesota into one of worst localities for fraud in America. The US Conference of Catholic Bishops, which oversees Catholic Charities, also raked in $140 million from the government to bring Somalians to Minnesota.

Minnesota Dem Senate candidate Peggy Flanagan helped create a soft -on-crime policy board while Somali gang violence continued to go up, and reappointed a known fraudster in 2025 to a leadership position.

Former Special Counsel Jack Smith and the Biden Justice Department obtained data including the names, dates of birth, physical addresses, email addresses, and voter registrations of 649,000 of Americans. That includes even anyone who bought a MAGA hat.

California gas tax is $1.47/gallon while Texas is 38 cents. Duh?

The Supreme Court will look at the constitutionality of the 1868 law that bans home distilleries for bourbon and whiskey.

Minnesota Lt. Gov. Peggy Flanagan (D), now running for U.S. Senate, promised Millions to Somali Nonprofits: They 'Know How to Spend that Money Best'.
They sure do!

No wonder she's losing?

Until next week…
