

Civil Rights Division **was** a woke fortress inside Main Justice. When President Trump's team told those lawyers the American people had voted to end illegal DEI discrimination and scrub dirty voter rolls, about 300 of the division's 400 attorneys walked out. The holdouts inside the division held "crying sessions" and "unhappy hours" after it was made clear the era of weaponized civil-rights law was over. *Al Sharpton has been vewy vewy quiet lately. Maybe that's because he still hasn't paid his taxes? He owes \$4.5 million!*

BTW: The Federal workforce has shrunk by more than 336,000 bureaucrats since Trump took office.

ExxonMobil has confirmed its Joliet, IL refinery is fully back online after a successful restart: "11 million gallons per day of diesel and gasoline production capacity are back online." (July 27, 2026).

FYI: The newest refinery with significant output came online in 1977. We don't have an oil supply problem. We have refinery and distribution problems. Ever wonder if a non-English speaking truck driver was delivering to your neighborhood gas station? The load of gas or diesel might wind up at the nearest Waffle House and start a riot.

All the news I see fit to print.
Freedom of the press belongs to those who own one.
God...family...country.

God is a religion that recognizes the good in us.
 Family is the group that worships that God.
 Country is borders, common language and culture.

Every evil in history pits any one of these against the other. Do the Amish outnumber the Muslims in most versions of heaven, unless it contains 47 virgins?
 Where did the virgins come from?

Where we're at right now:

The lesbian chaplain at the church of Texas Democrat James Talarico doesn't believe that Jesus Christ died for the sins of humanity. In fact, she's not even sure Jesus ever existed. Talarico is running for the US Senate in Texas.

OK...that's what the lesbian believes. Go right ahead BUT don't tell me I have to believe that just because you do. I will consider your effort to force me to believe what you believe as evil and will react. If you try to force me to believe, you'll find out what FAFO means.

So how does Talarico fit into her beliefs? Is she supporting his bid for a Senate seat so she can get laws to support her beliefs? Am I stretching the logic? Then why is Islam allowed to be taught in public schools but not the Bible? Because they passed a law? Does that law affect God, family or culture?

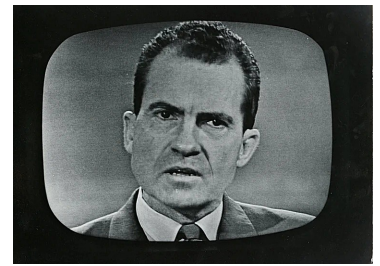

Any law that gives a right to someone while taking a right away from someone else...that's evil. By all means, keep the discussion below the stage of argument. Here's how it works:

We started with The Constitution and the Bill of Rights. Over the years, we've added 27 amendments that prove my point. Alcohol was good...then it was bad....then it was good again.

Discussion that boils into argument leads to evil.
 Or did you forget the issue of slavery and the Civil War?

How about a discussion between an Imam and that lesbian chaplain about what heaven has in store for us...or even what heaven is and whether God is male or female.

That should keep them busy and off my lawn!

The first televised presidential debate in the United States, Richard Nixon, squared off against John Kennedy. Kennedy won thanks to a lot of help from Don Hewitt of CBS News, who supported him: "Hewitt convinced JFK to wear pancake make-up to soften the harsh glare of the studio klieg lights. During the broadcast, Hewitt instructed the camera operators to frame Kennedy in profile with a wide angle. For Nixon, Hewitt ordered straight-on extreme close-ups — the equivalent of a mug shot. Don Hewitt, by the way, perfected his craft as founder and producer of CBS' 60 Minutes. The 'villain' of each 60 Minutes segment has always gotten the Nixonian treatment.

Welcome to the world of objective television journalism.

Of course, Television is a small and dwindling part of the Lame Stream Media. Their coverage of the Lindsay Clancy story was only 35% negative while their coverage of Elon Musk has been 96% negative. One killed their three children while the other exposed government theft.

The Good Guys:

Three news aggregate websites are my first search area; whatfinger, citizen free press and Instapundit. There are literally dozens more that provide every angle of any news story. You can't rely on the integrity of one "journalist". Sift through as many news sites as time permits and you'll see a common thread that makes sense. That's what I do and make it part of this newsletter. Major conclusion: that orange man ain't so bad nor even a Nazi after all!

Then there are the state judges who will decide close election calls. Did you know that Michigan's Supreme Court has 7 Justices, 6 were installed by Democrats and 5 of them HAD NEVER BEEN A JUDGE BEFORE?

Gretchen Witchmer (sic) won Michigan by 469,870 votes in 2022 while Michigan had 586,231 more voters than eligible voter-age citizens. See the problem?

A Supreme Court decision allows the use of an immigration database to check voter eligibility. The Department of Homeland Security now can use a verification system it has built over the past 18 months that merges a database containing the citizenship status of immigrants, along with Social Security information for all Americans and other federal records. The administration has also threatened prosecutions of elections officials and is preparing to send poll monitors to a swath of states. However, new restrictions on mail-in ballots—have been blocked by the courts for the midterms.

VOTE RED

The government can legally engage in transparent public relations and information dissemination since the repeal of the Smith-Mundt Act and enactment of the 2013 Modernization Act that lifted the ban. So...Obama got the change and now Trump is using it during the midterms. Another genius move by the Democrats. Watch for the ads and just imagine how it fuels additional TDS. Art of the Deal!

I saw the first one during an NFL game immediately following one for Amy Klobuchar. Bet she loved it too.

*(a small and particularly interesting
item of gossip or information)*

Denmark granted special residence permits to 321 stateless Palestinians from Lebanon in 1992. By the end of 2019, Danish government data showed that 196 of the original 321 (61%) had been found guilty of 881 criminal convictions.

Nimco Ahmed, the CEO of a center under state investigation, joined the "Klobuchar team" during Amy Klobuchar's first Senate run.

Ever wonder why the assassination attempt on Trump in Butler, PA was the only rally televised by CNN?

Trump's latest trick was to get the Lame Stream Media to defend the first amendment.

President of Argentina Javier Milei blasted the UN as "useless" and only serves to feed a caste of "fatally arrogant parasites" during last week speech at the U.N. General Assembly.

Former FBI Director James Comey asked the court for a 4-month delay of his trial in his Trump seashell 86/47 assassination threat case.
