The Frank Report

10.31.2026 #566

All the news I see fit to print.

Freedom of the press belongs to those who own one.

Robert Reich *(4 foot 10 inch)* calls for the "defunding" of Elon Musk, says Democrats should go after Musk's companies. *"Democrats ought to [start] laying the ground-work for nationalizing Starlink & SpaceX... It should be a public corporation."* Does he want Musk to drop another $50M on midterms?

Crime Prevention Research Center reports armed citizens stopped a third of all "active shooter incidents" from 2014 through 2025 correcting the FBI report claiming only 3%.

In an interview on Somali TV of Minnesota Secretary of State Voter Outreach Director Melanie Hezlip was asked what Somali viewers need to bring to the polls this election.

Her answer: nothing.

"If you're already registered to vote, you don't need to bring anything with you," Hezlip said. *"You just show up to your early voting location. "As long as you're registered to vote, you don't need to bring anything with you,"* she added. *"Even if you're not registered,* she explained*, you can still register on the same day without an ID".*

Lots of Judges on the ballot. Never heard of any of them. Maybe pass a law that if they get overturned more than X times, they get booted off the bench. Maybe born in US also a requirement. Not allowed to associate with nor contribute to ANY political party.

Just in case, I wrote in friend Ralph's name on the ballot. I'll buy him one of those black robes if he wins.

Have you noticed how memes have become the heart of facts in our world? Iran is stalling hoping Trump loses all power to negotiate with them. They know the price of gas is also an election issue and oil companies are using it to grab huge profits from prices they can't justify. Fake polling data has Democrats well above their actual rank. The Lame Stream Media is doing everything they can to discourage voting. Even the fraud election systems like California's is in trouble due to the spotlight now shining on it. The major mistake Democrats are making, specially in Minnesota, is running against Trump in the midterms while Republicans offer the best candidates they've gathered in decades.

Gov Walz knows he's a laughing stock so the Dems have recruited Amy Klobuchar from her senate seat to run for governor since her senate seat would still be there if she lost to Lisa DeMuth, who as Speaker of the MN House, has fought the Dems for years. Timmy's Lt Gov knew she didn't have a chance as a replacement for Timmy, so she's running for US Senate only to find herself against Michelle Tafoya, a nationally known personality from the sports world who is now leading in that race as an independent. Klobuchar won her first election due to her dad's name as a sports reporter. Ironically, Tafoya ***is*** an actual sports reporter.

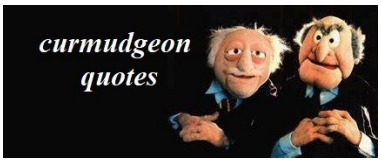
Microsoft offers voluntary buyouts to 60,000 employees as AI leads to efficiency push. *As they push right off the cliff!*

America's two largest teachers unions spent more than $930 million on left-wing political activity, lobbying, and advocacy

Poll Watcher in New York City was removed before the ballots were sealed. Election officials kicked out the poll watchers and had them removed. They would not seal the ballots and wouldn't close the voting machines.

Michael Rivera my choice for Farmington MN school board. Brother vet and friend.



I'm on the couch, hiding from exercise. If anyone asks ... I'm in the fitness protection program.

That 401k is actually a race between your money and politicians looking for it.

Remember when we smacked the TV to make it clearer? Does that work with people?

Why do they keep talking about Social Security running out of money but not welfare programs or foreign aid?

BTW: Social Security checks return the money they took when we needed it the most.

Mental health tip: allow 8-10 hours alone time every morning to prepare for the day.

Answer your phone with "Hi...my battery is low" so you can hang up anytime.

Hand out candy cigarettes this year. They'll skip you next year.

Remember, if you can't say anything nice, at least make it funny.

Friends therapist told him to write letters to anyone who has hurt him and then burn them. He asked me what he should do with all the letters.

Tip for "journalists": if all your headlines are identical, that's advertising and not news.

The difference between conspiracy theories and the truth is about six months.

Anyone else notice Big Pharma has a drug for everything but not a cure for anything?

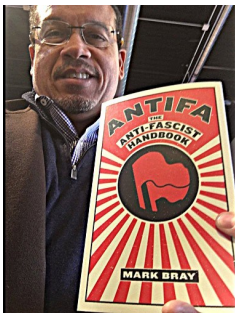
Liberals demand gun control after every shooting but never border control after rape or murder by illegals.

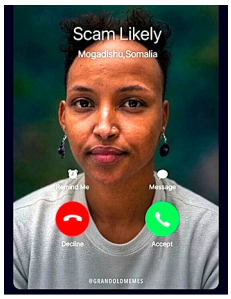
I identify as a problem.

Continuing from previous page...we now have Keith Ellison, our attorney general who wants to defund the police while wearing the mantle of law and order. The GOP found a real legal scholar in Ron Schutz, who would destroy Ellison in a debate which is why he avoids it. Schutz is a leader of the American College of Trial Lawyers and named one of the top 200 lawyers in America (among the millions). Ellison's career highlight was railroading MPLS police office Chauvin for the death of George Floyd. If Ellison denies this...

...this is one of those pictures the Red Star Tribune forgot to destroy. Notice Amy Klobuchar on the right?

Here's another picture I'll bet Ellison cringes every time someone finds it. His buddies at Antifa were responsible for the *"mostly peaceful"* riots that burned down acres of buildings after the George Floyd fiasco. And he wants a third term?





And, of course, we have *eleven*han Omar (or whatever her name is) running again in the filth district in MPLS where most of the MN fraud took place. I don't care if she did marry her brother. However, I do wonder how much fraud money she gave him?

Don't forget to wear your ICE hat Tuesday. They're on sale at Amazon. But, curiously, only a few are available before Nov 3rd. A MAGA or Trump hat might start an interesting discussion with election people since he's not on the ballot. FBI hat works too.
