The Frank Report

11.21.2026 #569

All the news I see fit to print.

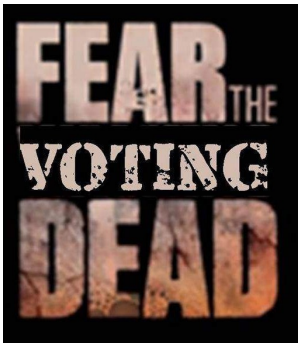

Freedom of the press belongs to those who own one.

Obama buddy **Van Jones of CNN** *(with his ex-wife. She couldn't stand him either?)*

Glenn Beck reported that Van Jones admitted that the Left ran a covert network of tens of thousands of operatives to push one specific word on social media: affordability. The network is a professional operation run by Heather Booth, a veteran DNC organizer who has trained over 25,000 community activists. It works with an entire smorgasbord of leftist groups: MoveOn, SEIU, the Teachers Union, the House Democratic Campaign Committee, and many more. When you heard about "affordability" on your socials, you may have been hearing a political campaign. Oil plummeted nearly 9% in a single day, gas prices are falling, and jobs numbers just blew past expectations… exactly as Trump predicted back in September. Watch how fast "affordability" quietly disappears from your feed now that the election is over…until they need it again.

ALSO...

Elon Musk launched a ***Starship*** rocket that deployed more than 26 V3 satellites and then returned that ***Starship*** so it could be used again. He has now created an un-censorable, direct-to-cell global communications and computer layer that bypasses national telecom monopolies, undersea cable chokepoints, and local regulatory vetoes. Musk can now deploy AI data centers more powerful and well beyond the political roadblocks of those on earth with global broadband faster and cheaper than the earth bound data centers.

Others have tried to duplicate Elon's success. The same week of this historic event, a Boeing-Lockheed rocket suffered failure mid-flight, destroying a payload of 40 Amazon satellites meant to compete with Elon's ***Starlink***.

Congress critters have been hauling Elon into Washington to harass him because he has trained a spotlight on their total ineptitude as NASA systems cost 55 times more than Elon's space launches. Elon launched 165 rockets in 2025, more than the rest of the world combined. NASA launched two.

Remember when CA Gov Newscum harassed Elon? He moved to Texas. Now a Texas Democrat is harassing him oblivious to the fact that Elon is also building in Louisiana. How dumb does a politician have to be before they realize you don't chase away a trillionaire who pays taxes in your state? Now Democrats threaten to start harassing him at the national level. They might want to consider Elon's rocket powered Starshield project before they open their mouths without engaging their brains.

With the success of ***Starship***, Elon now has an industrial heavy-lift engine capable of replenishing entire defense constellations in just a few days allowing the military to drop 100+ tons of cargo anywhere on Earth in under 45 minutes.

Elon started eight very successful companies in a diverse field of enterprises. The most famous two include Tesla and Neuralink. In his spare time he got a car to do somersaults over a bunch of trucks. Why anyone would mess with him is beyond me but here we are. It's fun to watch their attacks on X (formerly Twitter) when they forget he owns it.

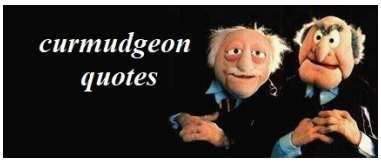

This is Emma Tucker, news editor at the ***Wall Street Journal*** *(picture from the Klaus Schwab World Economic Forum in Davos in 2024).* She authorized a photo of Treasury Secretary Scott Bessent's house, and included a geolocation on it so Iran could find him. He had to move his family to a safe location based on terror threats that followed. *Anyone know where she lives?*

CNN director admitted to James O'Keefe, that they only focus on the race of criminals when they are white, covers up when black assailants attack Asians.

Washington Post is attacking Marco Rubio for attending his son's college football games on US gov't planes. For security reasons Rubio must travel on these planes. So his only option is don't go to his son's games or use government planes.

Lame Stream Media took a shot at Hegseth when he and a group were at the Tomb of the Unknown Soldier. The guard used a loud voice to remind them of the need for respect so loud voices are discouraged. The ***LSM*** forgot to include that Pete awarded that soldier a medal for doing his job even if it may have embarrassed that group. *Wonder what would have happened to that soldier if it had happened to a Biden gang?*

My kids have a safety tip for you city kids: jumping out of the barn loft is not a good idea.

Wonder what would happen if we held pride parades next to muslim rallies?

The difference between the Titanic and California? The Titanic sank with its light on.

You can silence 50 scholars with one fact but you can't silence one idiot with 50 facts.

Maybe cats invented Amazon to get the free boxes?

My problem solving skills are great but my problem causing skills are even gooder.

Whatever you're doing, you're not doing it wrong if nobody knows what you're doing.

Looks like that blue wave is the beginning of a crime wave.

I bet none of my recorded calls have been used for training or quality purposes.

Quit telling me to believe in myself. I'm the one that got me into this mess.

Never mind what I did today. Ask me what today did to me.

You should pay taxes so the government can protect you from what they will do to you if you don't pay taxes.

Some days I amaze myself. Other days I finally find my glasses in the refrigerator.

The problem isn't too much liberty. The problem is too much government.

During elections, politicians ask us for our money. After they're elected, they just take it.

Join me in this urgent message to all levels of government: "Please Stop Helping"!

I've noticed that political disagreements are sounding a lot like religious disagreements. They think they know what God demands us to do but have no idea of who or even what God is. If you don't agree with some religious leaders, they will use social shunning to destroy you. *(One will even kill you!)* If you don't believe some political leaders, they'll use lawfare to destroy you. When I was a kid, I was told I'd go to hell if I ate meat on Friday. Today politicians tell me they will make my life hell on earth if I support the wrong politician. Some religions think women are not suited to be leaders while politicians believe women are sane when they want to kill their children, either in or out of the womb. I have now reached the point where I would read any of the many versions of their "bibles" only to find that water to wine recipe. Religious leaders think their "bibles" claim to be the will of God. Political leaders have adopted the same attitude.

I don't rely on the First Amendment much these days because none of these "leaders" would listen anyway. I do know that even God wouldn't help them if they forgot about the Second Amendment and forced me to accept what they say. Clint Eastwood had it right: *"Stay off my lawn and leave me the hell alone."*

While I'm taking a hard look at history, remember the outhouse? It disappeared around the time the Lame Stream Media newspapers lost a substantial number of subscribers and after toilet paper was invented. I don't even want to speculate why some people take their phone into the bathroom.

Anyone else notice how RINO John Thune gathered enough votes to keep his Senate leader job but couldn't get anything else passed? Over 700 bills passed by the House and he couldn't get them passed in the Senate? Thune has also blocked confirmation of 25 federal level judges offered by Trump. The Senate Majority Leader can be removed by a vote of their party's caucus. *Wonder what they're waiting for?*

Tidbits

(a small and particularly interesting item of gossip or information)

Chief of Staff Stephen Miller… New Rules Against Staffers Meeting Lobbyists in White House.

The Constitution says if a president is impeached by the House but not convicted by the Senate, he can run two more times. Chose wisely!

Over 300 bars and restaurants have closed in Democrat-run Los Angeles due to city mismanagement since January, a 25-percent increase over the 241 that closed in 2025.

Customers at Chase, Bank of America, Wells Fargo, U.S. Bank and others hit walls trying to log in, check balances, or move money. 4,800 reports on Chase alone by early afternoon, more than 2,000 on Bank of America, and spikes at Wells Fargo, U.S. Bank, and Zelle.

United Airlines says it's experiencing a "widespread system outage" days after the nationwide ground stop.

UK church ordered to stop ringing its bells after 137 years because one person complained. *Interfered with those muslim loudspeakers?*

Minnesota Gov. Tim Walz traveled to the Middle East to attend the United Nations Climate Change. Conference. *To promote Learing Centers? Guess who paid for this.*

MN arrests reporter for reporting. Local news didn't report it. James O'Keefe is going to sue.

Ilhan Omar warrants and subpoenas about to be released by an anti-Trump judge. *Want to bet the local news won't report that?*

Until next week…
