The Frank Report

11.28.2026 #570

All the news I see fit to print.

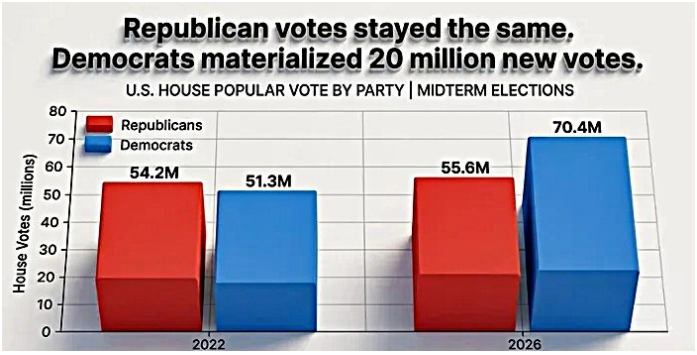

Freedom of the press belongs to those who own one.

If You're Worried About Cyberattacks on Infrastructure, Banks, Airlines, Gov't Agencies, Microsoft, Apple and Top Corporations in World, But You're Not Worried that the Midterm Election Was Rigged and Stolen…You Might Be a Democrat.

Advanced AI tools are letting attackers create exploits faster than outdated systems can respond. An exposed staging server held a multi-agent framework called exploit_agent. It compared code before and after security patches, identified the weakness the patch fixed, wrote an exploit, and launched it. No human directed the steps. The same server held stolen data and scripts for reconnaissance and webshells. One foothold in a related campaign reached domain admin in minutes. The window between a patch announced and a working attack used to be weeks. It is now measured in hours or less. I can't think of any known Democrat smart enough to do this but I'd put money on Soros *(age 96)* as his last shot at us.

Republican candidates repeatedly finished near 85% of President Donald Trump's 2024 vote share. The account calls it the "15% Band" and argues that the consistency raises serious questions about the reported election results.

Those questions deserve answers backed by data, audits, and ballot records—not slogans from either side. The 85/15 relationship describes the reported results. It does not yet identify the mechanism that produced them—and that unanswered question is exactly where serious scrutiny begins.

38 MILLION QUESTIONABLE VOTER REGISTRATIONS have been identified across 35 states.

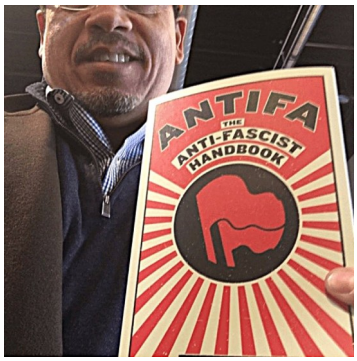

Public Records Reveal At Least 8,000 Noncitizens on Virginia Voter Rolls — With Documented Illegal Votes Cast Across Arizona, Pennsylvania, Texas and Other Battlegrounds. *Now do the dead people.*

Certified Midterm Election in Nevada Includes No Chain of Custody, Daily Unreconciled Counts, and 1.5 Million Excess Ballots. *Certified fraud?*

Texas election officials are putting their vote-counting machines to the test, launching the state's first full statewide risk-limiting audit using the Nov. 3 U.S. Senate race between Democrat James Talarico and Republican Ken Paxton as the inaugural subject. The audit was scheduled to beginThursday, Nov. 19, and will rely on randomly selected paper ballots that get hand-counted and compared against the machine totals that determined the race's outcome.

Here's another strange event: Michigan Republicans File Federal Investigation After Chinese-Made Election gear in Several Districts Found Emitting Electronic Internet Signal.

Voter fraud has been developing and improving for decades. The hidden mechanisms behind election fraud, from voter rolls with dead people and census data that include illegal aliens to boost the population count in a state, to foreign control of electronic voting machines, algorithms used to produce illogical vote results, ballot stuffing, and vulnerabilities in election infrastructure have all been refined to overwhelm the system and make elections nothing but an ugly perversion of what it once was.

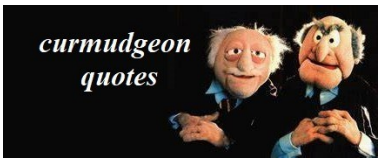

Keith Ellison got a 21% increase in votes from just four years earlier. That's 266,000 votes that came from where? Antifa?

ABC staffers, senior producer Justin Fishel and desk assistant Nathan Lee, suspended after an internal investigation into a botched hit piece on Donald Trump Jr. that suggested impropriety in his business dealings. *ABC will promote the guys who do it without getting caught?*

Arizona, Michigan, Minnesota, Nevada, Pennsylvania, and Wisconsin could join Hawaii and the 13 other U.S. jurisdictions that legalized assisted suicide if newly empowered Democrats revive past efforts during the next sessions of the state legislatures they now control.

Israeli Defense Minister Israel Katz delivered a stark warning Tuesday that the Iranian regime has activated sleeper cells operating on U.S. soil and issued explicit orders to eliminate President Trump, members of his family, and other senior American officials.

Gov't agency (NTIA) has a $738 million subsidy to provide internet service to all 50 states. Elon negotiated with them and said he could do it for free using Starlink. Saved almost a billion taxpayer dollars. Watch for Democrats to attack the offer and force the money to one of the companies owned by their donors. Media will also pile on and spin it to the negative and then blame Trump.

Vegan food isn't too bad after you add meat and cheese.

Unlike the brain, your stomach signals you when it's empty.

Apparently, becoming a Democrat can change a man?

Remember Covid? My tinfoil hat was more effective than those masks.

So, gas prices are dropping because of the politicians who won't take office until next year?

Gun free zones** are actually **only bad guys have guns zones.

Free speech was not banned in Britain and they'll jail you for saying it was.

You aren't overthinking. Things are overhappening.

Liberals want a female president. How will they know when they have one?

Don't leave vengeance to the Lord. He's much too lenient.

I'm not anti-social. I'm pro-solitude.

My drug tests came back negative. Guess I'm just weird.

Dogs will attack bad guys if their owner is threatened. Cats will attack their owner.

Cats will calm humans that are stressed. Cats will also stress humans that are calm.

Lawfare presumes innocence of a person until they are proven to be Republican.

I don't miss being young but I do miss the world I was in when I was young.

Notice how Democrats are very quiet about the pride flags getting banned by the muslims they elected?

*This column is a **potpourri** of news I haven't included yet. If you're not familiar with the word "potpourri" join the club and check out my first encounter with it on my website. An embarrassing moment for me.*

Congress hasn't worked enough hours in 2026 to meet the Supplemental Nutrition Assistance Program's work requirements. SNAP was formerly known as food stamps. We now know who the "welfare queens" are.

Secretary Robert Kennedy Jr and Dr. Oz have discovered over one million people on Obamacare with NO social security number.

California Prop 38: $4.2 billion in tax dollars to fund immunology research, and the money goes to a yet-to-be created entity to be run by the drafter of the ballot proposition mandating the $4.2 billion goes to him.

Sobering thought: unless election fraud prevents it, all four states bordering Mexico will have Democrat governors. That won't end well.

Sec of War Pete Hegseth is replacing the cost-plus contracts Eisenhower warned about—contracts that reward every form of waste and delay—with fixed-price, long-term deals that give suppliers the predictability to hire workers, expand production lines, and rebuild the shipbuilding and industrial base the United States allowed atrophy since the end of the Cold War.

An interesting power shift at the Pentagon thanks to Pete Hegseth. In 1945, the Office of Strategic Services (OSS) was dissolved. Two years later, the CIA was born as an "independent" agency. November 2026, the Pentagon has revived the OSS name and is elevating its special operations leadership and expanding its institutional authority. The CIA can no longer use this power like they did with the Bay of Pigs fiasco when President JFK vowed to *"splinter the CIA into a thousand pieces and scatter it to the winds"*. Better late than never?

House Republicans passed MORE THAN 1,000 BILLS AND RESOLUTIONS this Congress, and ALMOST 700 OF THEM DIED IN JOHN THUNE'S SENATE. That includes a ban on congressional stock trading, the farm bill and the SAVE America Act, which the House passed THREE TIMES. Republicans ran the Senate. Thune and the GOP senators had the power to break the logjam, and THEY REFUSED TO FIGHT.

Our muslin neighbors celebrate a 30 day fast called Ramadan fasting from dawn to sunset. That means big breakfast before sunrise…skip lunch…big dinner after sunset. Those are rookie numbers. As a recovering Catholic, I remember the 40 days of lent that introduced the tuna casserole to the world.

Will Trump's pardon of the Thanksgiving turkeys be over ruled by a federal judge?

Tidbits

(a small and particularly interesting item of gossip or information)

Democrat States Must Pay Back Taxpayers Over a Billion Dollars for Illegals' Healthcare and Dentist Appointments. Minnesota owes $12,748,514.00

Trump Says FBI Hack Could Expose Deep State: "Maybe We'll Learn About the Voter Fraud… Wouldn't it Be Great to Learn About Russia, Russia, Russia?"

NY Mator Mamdani Was Arrested At Least Twice by the NYPD Tactical Unit He's Disbanding.

The number of hunting licenses sold in America was greater than the ten largest armies in the world combined. *Think about that.*

About 300 young people belong to roughly a dozen Somali gangs and estimated total gang membership across all groups in the Minneapolis metro area at up to 2,000.

Government stopped making pennies because they cost more than they're worth. *Now do Congress.*

Democrat-run Congress violated Constitution with $1.7 trillion spending bill in 2022, court rules.

Supreme Court Justice Sonia Sotomayor wants the Supreme Court to abandon the pesky concept of legal theory and instead issue rulings based on feelings.

Great grand-daughter KJ tells me she is soon to be a big sister. Life is good!

Until next week…
